They start even...

But 33 days later...

Lower-quality starter Improved Super Startena

Improved Purina Super Startena gives you...
Extra growth you can see and feel

Cover the right half of the lower picture with your hand. The pullets on the left don't look bad at all, do they? Now uncover the Super Startena-fed birds on the right! Same age... 33 days. Same amount of starter... only 2 pounds. But what a difference in growth!

There is a live-chick demonstration at our store right now. That's where you can see and feel, in the flesh, the extra growth Purina's improved Super Startena puts on chicks. While you're here, check their age and

size. Heft one or two of the chicks. *Feel* the solid, chunky weight of those Super Startena birds. Livability's another big thing. Records from farms all over the country on more than two million Purina-fed chicks showed an average of 97.3% livability!

The same feed that produced birds like these is ready to work for you. Ask us for Purina's improved Super Startena... and get that extra growth you can see and feel.
