

Travelers Report

(Continued from Page One)

The farmers are in distress throughout the area. It is doubtful if much corn will be planted this season in the Cornbelt areas as it is believed the season will be too late by the time the ground can be prepared even should the rainfall stop now.

Wheat lands are also damaged by rains and flood waters. Many other crop yields will be reduced by the extreme rainy weather.

Farm and Home Day

(Continued from Page One)

Dwight Younkin of Penn State was on hand to explain the use of silage and forage in a swine feeding program. This program, recently developed at Penn State, has shown that sows on silage until farrowing time produce more pigs at lower cost and handle the litter better after farrowing.

The ladies were not forgotten at the Field day The Home Economics department featured exhibits on furniture refinishing, mental health, foods and nutrition, movies on topics of interest to women and 4-H Club demonstrations.

Giving demonstrations were four young women from Lancaster County They were Misses Bonnie Bare, Witmer; Ginno Glass, R5 Lancaster, Phoebe Griffith, Ephrata and Elaine Gockley, Ephrata. Miss Bare and Miss Glass demonstrated making a Vienna Chicken Loaf and Miss Griffith and Miss Gockley showed how to hem a dress.

In the baling demonstrations, a new hand assembled model John Deere baler stole the show. The new baler, making 17 inch bales, ejects the bale from the chute into a trailing wagon by tossing it high into the air. The company says that this, combined with a recently developed random stacking system for barns, will cut hay-making to a one man job

Also on exhibit were test plots of various varieties of hay and small grain crops, chemical test plots for both insect and weed control, and fertilizer value test plots

Busses took spectators to the more distant stops. Officials on hand for the field day were Arthur T Prasse, commissioner Bureau of Corrections, H. R. McCulloch, assistant state director extension, L H Bull, deputy state secretary of agriculture and Cumberland County Agent John T Fogel, who presided as general chairman.

A concert by the School band, L H Seltzer directing, was given at noon.

Two restaurants were operated by the Cumberland County Society of Farm Women.

Broilers

PHILADELPHIA — Unsettled. Supplies of most classes were in excess of the light demand. Large White Rock pullets 24-25 cent Large White Rock caponettes 24-25 cents without clearing Silver Crosses large sizes 19 cents to clear Cross fryers 24-25 cents straight Cockerel Crosses 23-23½ cents White Rocks 23 cents Reds 23-25 cents with bulk unsold Silver Cross broilers under 3 lbs 23-24 cents Turkeys, unsettled Demand light for more than sufficient supplies Buff and bronze mixed breeders 25 cents White Holland breeder hens 20 cents Toms 17 cents.

Total receipts June 4, 68,000 lbs included Md, 6,000 lbs Del. 19,000 lbs.

Wholesale selling prices No 1 and fancy quality. Broilers or fryers heavy type 3 lb 23-24 3-4 lb 23-25. Pullets 4½ lb and over 24-25 Hens heavy type 17-22 light type 12-15. Old Roosters 10-11. Ducks Muscovy 28-29 Pekin 28-30

USDA Issues New Report On Stamps

A second report relating to the economic aspects of the use of trading stamps was issued today by the USDA's Agricultural Marketing Service.

This report deals primarily with the effect on consumers of the widespread use of trading stamps by grocers. Included in the publication are results from recent surveys on the attitude of consumers toward trading stamps who saves stamps and why, consumers ideas about the money value of filled stamp books, and their reaction to redemption merchandise.

The first report, Marketing Research Report No. 147 "Do Trading Stamps Affect Food Costs?" was issued in January and emphasized chiefly the basic characteristics of the trading stamp plans and some of the economic problem facing retailers and consumers as a result of their widespread use.

In the most recent study, researchers found that consumers differed widely in their feelings regarding trading stamps. Some showed great enthusiasm in their collection of stamps, others were antagonistic to the plan, and

still others were indifferent to it. Some accepted it as a necessary part of the merchandising scheme while others attempted to have it legislated out of existence.

Some consumers felt that they were getting something for nothing, others reasoned that any form of promotion which adds to the cost of doing business necessarily increase the cost of food. At any rate, it was estimated that about 60 per cent of all shoppers in the United States were saving stamps.

From Wilson **NEW DIMENSION BULK COOLERS**

Based on over 25 years milkhouse refrigeration experience

Standard capacities from 100 to 700 gal.

CHANGING OVER TO BULK WAS NEVER EASIER, never lower in cost, never faster than it is right now with Wilson's *New Dimension* bulk coolers. Pouring heights are low. Cooler lengths are shorter so they will fit into more milkhouses without costly structural changes. And wiring costs have always been lowest with Wilson.

You get Wilson's famous Isolated Ice Bank with Drop-In Refrigeration Unit. Your milk is always safe (24-hour protection in case of power failure). Any maintenance required is fast and easy.

"2 Stores To Serve You Better"

WIRTHMORE FEEDS

NEW Dextropep Dry Molasses

46% Sugars

SILAGE PRESERVATIVE

Concentrated Feed Value — Don't buy expensive water. The total digestible nutrient content of ordinary molasses is about 54%. Dextropep contains approximately 80 % total digestible nutrients, or 48% more energy.

Palatability — Dextropep is sweet, granular and free from dustiness. It makes feeds taste better, increases consumption of feed and water.

Convenience — Dextropep is dry and free-flowing for easy mixing. The 50-lb. bag is moisture and rat resistant and easy to stack.

	Per Ton
Grass Silage	25 lbs.
Legume Silage	50 lbs.

Dextropep ferments to the proper acidity in about 48 hours and retards spoilage, adds real feed value, and reduces excessive moisture. Corn oil meal will absorb six parts water and reduce loss of valuable nutrients.
