

U.S. Agricultural Exhibit in Spain Wins Two First Place Awards

The U S Department of Agriculture today announced that the market promotion exhibit of U S agricultural products at the 25th International Samples Fair in Barcelona, Spain, received two first-prize awards as the outstand-

ing international exhibit at the Fair The Fair was held June 1-20, 1957

The awards, accompanied by handsome silver trophies, were presented to the U S exhibit management by the Barcelona Association of Manufacturers' Representatives and Radio Barcelona, one of Spain's oldest and best known radio stations The U S exhibit, designed to promote foreign marketing of U S farm products, was judged best in design, operation, and over all general excellence by both organizations

Commodities displayed in the 15,000 square-foot exhibit included cotton, grain, seeds, tobacco, dairy products, poultry and poultry products, and vegetable oils. The display, the fourth sponsored this year by the Department's Foreign Agricultural Service, included a continuous fashion show demonstrating the season's latest cotton styles, fabrics, and accessories. Also shown was a process for recombining milk and making ice cream from non-fat dry milk and anhydrous milk fat which do not require refrigeration.

Other demonstrations and exhibits included cake-baking with prepared mixes, cooking frozen poultry, sampling of potato chips fried in pure soybean oil, and the growth of improved seeds illustrated by time-lapse motion-picture photography

The exhibit was presented in cooperation with the following trade groups: Cotton Council, International; Dairy Society, International; Soybean Council of America, National Grain Trade Council, American Seed Trade Assn, and the Institute of American Poultry Industries.

The prize-winning exhibit, including the pavilion in which the displays are housed, was constructed in demountable fashion and will be reshowed in future trade fairs in Europe and South America.

Farmers Supply

Good Pastures Mean Good Livestock — Use PASTURGO*

PASTURGO is specially formulated to meet pasture needs. It supplements plant nutrients in your soil. It gives the balance of growth elements needed to produce grass and legumes with higher feeding value and greater carrying capacity.

Use Pasturgo During September to improve your grassfields.

FOR FALL SEEDING — RYE OATS BARLEY WHEAT

Blenn is a specially formulated plant food for wheat-Oats - Barley - Rye; fortified with extra growth elements to meet the soil needs. Produces heavy yields.

Monday 8:30 - 12:30

WE'RE FEEDING CATTLE, TOO!

Visit the Steer Feeding Demonstration at the Stock Yards, Lancaster.

Pens 79A and 80A.

We can talk to you about Purina Steer Fatena and how it fits into any type feeding operation. We can tell you why it's better than a single-source protein. We can show you records of good daily gain at low cost... BUT THAT ISN'T LIKE SEEING FOR YOURSELF.

That's why we're running a cattle feeding demonstration... to let you see first-hand just what Purina Steer Fa-

tena can do. We're feeding two pens of cattle. One pen gets Purina, the other a single-source protein. We want you to watch the progress of this feeding trial. Visit it often. We're confident the Purina-fed steers will show you how you can produce faster gains and more beef at less cost with Purina Steer Fatena than with a single-source protein supplement.

The Steers were started April 27th to be fed 120 days, weighed and graded, divided into two pens of 10 steers each. They are being fed at Stock Yard hours.

RESULTS OF STEER FATENA	RESULTS OF 66 DAYS ON FEED
Gain Per Day . . . 3.16 LBS.	SINGLE SOURCE PROTEIN
Cost of Gain . . . 18.4c LB.	Gains Per Day Per Steer
Total Gain 10 Steers	2.70 LBS.
2055 LBS.	Cost of Gain . . . 19.1c LB.
66 Days on Feed.	Total Gain 10 Steers for
	66 days . . . 1795 LBS.

Watch for date of field day to be held at the Stock Yards on completion of this demonstration.

Cocklebur is poisonous to pigs when it is in the young, two-leaf stage Dwight Younkin, Penn State extension livestock specialist, warns farmers to keep pigs off pasture in which cockleburs are growing until the plants can be killed or they are too large to poison the animals
