| Fancy Heavyweights | 43 unchanged |

NEW YORK, Aug. 7 — Shell egg market irregular today. Really fancy lines being absorbed on nearbys, but not on Westerns. A number of lots of large shaded under the call, but buyer interest in a few quarters moved top prices up fractionally before the close. The position at noon was rather unsettled.

CRD, Sinusitis Research Topic Of Scientists

The newest developments in the fight against chronic respiratory disease in chickens and infectious sinusitis in turkeys were discussed at a recent meeting of representatives of a number of States cooperating with the U.S. Department of Agriculture in a coordinated research program for the investigation of these diseases.

Closely controlled experiments by members of this group of research workers, indicate that the practice of injecting laying hens with antibiotics to produce non-infected chicks is not a sure-fire method of controlling the spread of the chronic respiratory disease. In a number of trials, treated hens produced infected chicks, and non-treated hens produced healthy chicks.

Keeping chicks in small numbers and segregation helped produce disease-free flocks, the tests showed.

An experimental, rapid blood test for the diagnosis of chronic respiratory disease produced promising results, but more research is needed to develop improved or new testing techniques. The blood test determines the status of pleuropneumonia-like orator of pleuropneumonia-like or been identified as the cause of chronic respiratory disease by researchers in the Federal-State coordinated program and certain other scientists interested in the problem. They also have demonstrated the frequent complication of this condition by other poultry diseases. Such mixed infections present a serious economic problem to poultrymen because of the higher death-rate in infected flocks, fewer eggs, and greater feed and medication costs resulting from this condition.

Try 'em on a **Tough** Plowing Job!

New 800 FORD TRACTOR and FORD ECONOMY PLOW

Ford's new 3-pow 800 Tractor and the easy handling Ford Economy Plow really take tough plowing in stride! With them you can do 6 days' plowing in 4. And you'll find that the job goes easier, too.

With a front wheel in the furrow the Ford Tractor almost steers itself. At headlands, just nudge Ford's Hydraulic Touch Control lever to lift the plow out of the ground. You adjust plowing depth on the go with the same lever.

On tough plowing jobs you'll appreciate Ford's new Tailored Traction. As always on a Ford, traction increases automatically on heavy pulls. And now, new easy-on, easy-off wheel weights are available to give you still more traction.

A phone call to us will bring a new 800 Ford Tractor and Economy Plow out to your farm for a demonstration. Why not call us today?

Save plenty on share costs! "Razor Blade" shares for Ford Economy Plows cost so little you can replace them for less than the cost of resharpening.
