HELIOGEN (R)

DIATOMIC IODINE SANITIZER

TABLETS

The NEWEST Dairy Farm Sanitizer

HELIOGEN is new! Revolutionary! The ideal udder wash and best all-around dairy farm sanitizer for safety, economy and convenience.

IODINE! Traditionally the best germicide — in a new, more potent, safe form.

BETTER FOR COWS! Doesn't cause chapped and dried udders. Heliogen not only sanitizes udders, but also helps keep skin soft and pliable.

NEW FORM! Effervescent tablets — for easy use and quick action. No glass bottles to break, no liquids to spill or freeze.

EASY TO USE! Just drop one Heliogen tablet in a 10-quart pail of warm water and you're ready to sanitize. No measuring, no waste.

NON-CORROSIVE! Nothing to corrode milking equipment. Heliogen leaves no odor, taste or film.

Feed Test Shows Cobs Can Be Used As Roughage

Cattle can be fed to top profit finish on either ground shelled corn plus hay, or ground ear corn serving as both grain and roughage, if both are supplemented adequately, according to a feeding test recently conducted by the Ralston Purina Company.

Two hundred steers were involved in the test. Half of them were fed ground shelled corn and an alfalfa hay-molasses mixture with supplement.

The other hundred steers were fed ground ear corn, with supplement mixed into the daily ration. Sufficient molasses was added to make it approximately equal to the per cent of molasses in the corn-alfalfa ration. Both groups of steers had access to salt and minerals.

The hundred steers getting ground shelled corn and alfalfa hay gained an average of 3.30 pounds per day for the 128-day feeding period, compared to a 2.93-pound average daily gain for the hundred steers in the ground ear corn lot. Feed costs, however, in the ground shelled corn group amounted to \$80.92 per head, compared to \$65.70 in the other lot.

Average weights in the two groups were nearly equal at the beginning, about 740 pounds. The ground shelled corn steers weighed an average of 1,12 pounds at the end, compared to 1,116 in the other group.

The differences in rate of gains were essentially offset by the difference in feed costs in the two lots, and net profits per animal were nearly identical in both groups. Steers in the ground shelled corn group averaged \$23.03 net profit each, compared to an even \$23.00 in the other lot, showing that with proper grain supplement, cobs can be an effective roughage in the cattle ration.

For Tomorrow's
EGG PROFITS
start now
with
BEACON
Complete Starter

THE critical needs of replacement chicks at starting time are well known. Also well known is Beacon Complete Starter, a special feed formula for tomorrow's egg producers.

The nutrients in Beacon Complete Starter do more than support the early growth impulse. They help your chicks become well feathered, strong boned birds. It starts them on the road to the body capacity that means sustained laying ability later.

What's more, Beacon Complete Starter, like all Beacon rations, is backed by your Beacon Advisor — one of a team of specially selected, specially trained field representatives whose job it is to help poultrymen control costs, build profits.

Let us know how many birds you plan to start this year. We can tell you quickly how little it will cost to start each chick on Beacon Complete Starter. You'll be pleased at the low feed cost per chick, pleased at the extra nutrition your birds will be getting.

Beacon Dealers and Beacon Advisors are located throughout Lancaster County. For the name of the one nearest to you please phone or write:
