

Dr. M. H. Swanson, of Minnesota, Named to PENB Technical Board

Dr. Milo H. Swanson, Associate Professor of the Poultry Husbandry Department, University of Minnesota, was installed as Chairman of the five-member Technical Advisory Committee for the Poultry and Egg National Board at a recent meeting of the committee at PENB headquarters, Chicago, with PENB General Manager Lloyd H. Geil.

Each member of the committee serves as chairman in the fourth year of a 5-year-term appointment. As chairman, Dr. Swanson succeeds Dr. William J. Stadelman, Associate Professor, Department of Poultry Science, Purdue University.

Committee members are appointed by the President of the Poultry Science Association after consultation with the General Manager of PENB. One new member is appointed each year. Dr. M. L. Scott, Professor of Animal Nutrition and Poultry Husbandry, Cornell University, is the new appointee this year. Dr. Hans Lineweaver, Head of the Poultry Products Section, Western Utilization Research Branch, U. S. Department of Agriculture, completed his five-year term on the committee at the close of 1957.

Other members of the Technical Advisory Committee, in addition to Swanson, Stadelman, and Scott, are Dr. George M. Briggs, Chief, Nutrition Unit, National Institutes of Health, Bethesda, Md., and Dr. Herbert S. Wilgus,

Director of Research, Peter Hand Foundation, Chicago.

Among the duties of the committee are the following:

1. To provide technical advice to PENB and its staff members on the role played by eggs and poultry meat in health and nutrition.

2. To seek out problems related to the functions of PENB that are suitable for support by grants-in-aid and to make recommendations to the Board through the General Manager as to the placement of specific grants.

3. To lend technical advice to the Board in connection with its preparation of consumer-information releases and publications. Technical information proposed for publication by PENB is submitted to committee members for review.

It's The Law

"It's the Law" with simple answers is offered by LANCASTER FARMING in cooperation with the Pennsylvania Bar Association. General interest questions are welcomed, and will be answered as soon as possible. Letters must be signed. Answer will not be published on a specified, requested day. Questions cannot be answered by mail, and LANCASTER FARMING will reject any inquiry which is not of general public interest. Address all inquiries to "It's the Law," LANCASTER FARMING, Quarryville, Pa. (Fictitious initials will be used to protect the identity of the questions).

Q A tract of land is owned jointly by husband and wife. Subsequent to their acquisition of the land, the husband built a home on the land and he and

his wife are now living in the house. Will ownership of the house, as well as the land, automatically pass to the survivor under the rule of tenants by the entirety?—L.G.R.

A. Yes, ownership of land includes all the improvements on the land. Upon the death of the husband or the wife, the land, the house on the land and all other improvements would pass to the surviving tenant by the entirety.

Q. Would a will written on a piece of scrap paper be legal?—T.M.

A. Yes. If the writing on the piece of scrap paper purports to be a declaration of one's intention as to what should be done with his property at his death and is signed at the end thereof, it would be a valid will.

Q. Another woman and I own a house jointly. Our agreement is that if either of us dies first, the other inherits the whole house. Our deed reads, "With right of survivorship and not as tenants in common." Does this cover what we want?—E.E.

A. To create a joint estate with right of survivorship among persons other than husband and wife in Pennsylvania, it is necessary to use specific language in the deed to the effect that the property is to be held as joint tenants with the right of survivorship. It appears that the language used in your deed is sufficient to pass the property at the death of either of you to the survivor.

SPABC Holstein Bull Designated Silver Medal Sire

BRATTLEBORO, Vt.—A registered Holstein bull owned by Southeastern Pennsylvania Artificial Breeding Cooperative, Lancaster, Pennsylvania has been designated a Silver Medal Production Sire by The Holstein-Friesian Association of America.

Rag Apple Lockhaven Bondsman 1060223 is one of the comparatively few sires to be so honored in the entire history of the national Holstein organization.

The award is based on the production of a bull's registered daughters on official test as compared with that of their dams and with the production of the entire Holstein breed.

At least 10 pairs of daughters and dams must figure in the comparisons with the daughters having a total of at least 15 production records in either the Advanced Registry or Herd Improvement Registry testing programs.

Both are official breed improvement programs of The Holstein-Friesian Association of America and are supervised by state agricultural colleges.

To facilitate comparisons, all records of both daughters and dams are converted to the commonly accepted two-milkings-a-day, 305 day, mature equivalent basis used in sire recognition programs.

Calculated on this basis, Rag Apple Lockhaven Bondsman's 11 daughters compiled an official production average of 14,870 lbs. of milk and 575 lbs. of butterfat.

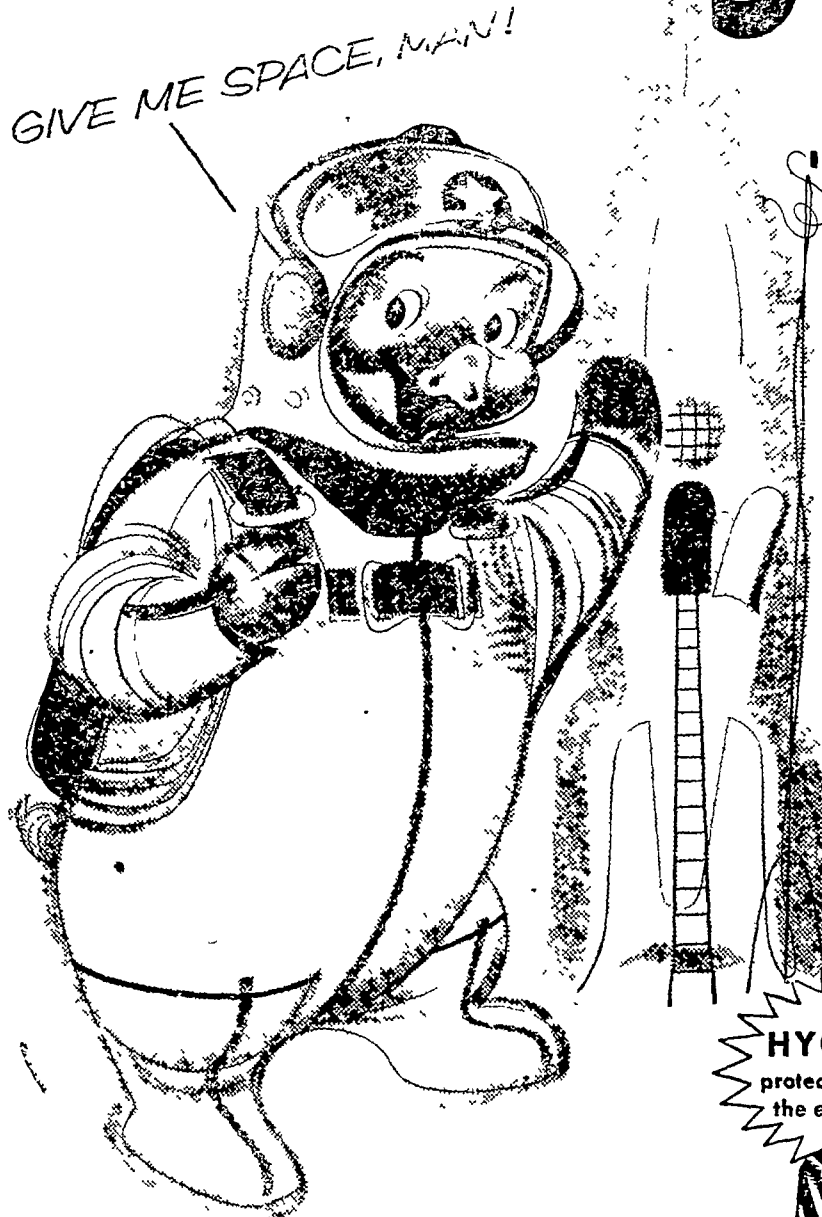

SUBSCRIBER SAYS

Robert W. Lefever, R1 Quarryville

We enjoy your paper very much. I especially like the recipes and the column "The Bible Speaks." My husband, of course, goes for another line which is everything about farming.

NEW FUL-O-PEP PIG STARTER PELLETS

Start Pigs Fast!

Speed 'em to market a full month earlier!

Pigs fed Ful-O-Pep at the Research Farm averaged weighing 64 lbs. at 10 weeks of age! As a result, many were marketed in 4½ months—a full month or two earlier than most pigs. What's more, early gains are low cost gains, too. So, this year, get your pigs off to a fast start and hit the early market. Feed 'em sugar-filled Ful-O-Pep Pig Starter.

They're sugar sweet and extra nutritious!

Baby pigs have a sweet tooth! And sugar-filled Ful-O-Pep Pig Starter Pellets taste like sugar candy to your baby pigs. That's why pigs start eating Ful-O-Pep within seven days. And remember... every bite contains the vitamins and nutrients needed to grow your little porkers big and healthy and curly-tailed!

FUL-O-PEP IS OUT OF THIS WORLD!

Switch 'em to Pig Grower for fast, continuous growth!

Start your pigs on Ful-O-Pep Pig Starter. At six weeks of age, switch to the high-efficiency yet lower-cost formula, to Ful-O-Pep Pig Grower. Tests show that it only takes 2 lbs. of Ful-O-Pep Pig Grower to produce 1 lb. of gain! It's the new, low cost way to grow pigs from 6 weeks to 60 lbs.
