

## New State Mark Set by Holstein On AR Test

BRATTLEBORO, Vt — A registered Holstein cow owned by Lewis A. Zimmerman, Leighton has shattered an all-time Pennsylvania production record on Advanced Registry test.

The Holstein Friesian Assn. of America reports that the official 25 day production of Zimmerman Panstar Royal Sandra totalled 22,567 lbs. of milk and 819 lbs. of butterfat.

It sets a new high in butterfat for Pennsylvania Senior three-year olds milked three times daily in the Ten-Months' Division of the AR program.

The new state production champion was bred by her present

## Somerset County Sugar Maple Season Opened

The Somerset County maple sugar season was officially opened recently with tree tapping ceremonies on the Courthouse lawn.

owner. She was sired by Zimmerman Star Pansy Ideal—A Silver Medal Production Sire.

In meeting the requirements of an official 305-day record, Zimmerman Panstar Royal Sandra was in calf for 167 days during her testing period.

Weighing and testing of her production was supervised by Pennsylvania State University as a part of the official breed improvement program of the national Holstein organization.

## It's The Law

Q My wife and I are considering separation. What is the maximum that I would have to contribute to the support of her and an 8-year-old daughter?—G.M.

A There is no maximum that you would have to pay or contribute to the support of your wife and daughter after separation. If an amicable agreement cannot be made, the court will determine the amount a man has to pay for the support of his wife and children after consideration of such factors as the man's present income, his earning capacity, expenses of the wife and children and all other attendant circumstances.

## Machine Cutting, Forced Healing Making Potato Planting Easier

(Continued from page eleven) cuts according to the size. Thus two, three or four pieces of seed may be obtained, according to the size of the potato.

Maine potatoes are used for seed because they show more vigour than potatoes grown farther south.

A new machine is being developed that will cut the seed in slices rather than in chunks as is now done. Various farmers throughout the county received seed produced by this machine for trial alongside the seed manufactured by the standard machine.

Working with the transportation problem were Howard W. Hruschka and Wilson Smith from

the Agricultural Marketing Service, Plant Industry Station, Beltsville, Md. From Eastern States, Robert Mullany, West Springfield, Mass., seed potato research man; and Harold Mengel, Ronks, crops field man; directed the seed distribution in Lancaster and adjoining counties.

## THE BOY WHO STARTED A \$48 MILLION ELECTRIC PLANT

GROUND BREAKING at Brunner Island near York Haven, Pa., January 21, where PP&L will complete a 330,000-kilowatt steam-electric station by the end of 1960.

ABOVE, 13-year-old Randolph C. Ryder turns over a spadeful of earth to formalize the start of construction of PP&L's newest power plant. Randy was asked to turn over this important spadeful for three reasons: First, he represents PP&L's customers of tomorrow for whom much of this additional power plant capacity is being built. Second, even at 13 years of age, Randy already owns shares in PP&L and represents the 95,000 shareowners whose invested savings along with those of the Company's bondholders help make possible the good electric service you enjoy. Third, he is a very special kind of shareholder for his ownership of securities symbolizes the fact that in this state, minors can now hold the securities of American business enterprises.

The recent passage in Pennsylvania of the Uniform Gifts to Minors Act opened the way for youngsters to become investors in American industry and to share, from an early age, in this nation's expanding and dynamic economy as well as secure a practical and early understanding of the American economic system.

The fact that people are willing to invest their savings, and thereby earn a reasonable return, is the means for developing much of the money with which power plants and power lines can be built and service supplied to our customers. In the last decade alone, investors have provided much of the \$413 million required for the Company's expansion during those years. In the next 5 years, an additional \$198 million will be required. *And where will this money come from?* Much of it again must come from people who are willing to invest their savings in anticipation that the money they put to work will continue to earn a reasonable wage. *Every time you turn an electric switch, you share in the benefits of their investment.*

## WHO OWNS YOUR ELECTRIC COMPANY?

—There are 95,000 partners in PP&L . . . almost enough to fill the largest stadium in Pennsylvania. In fact, 7 out of 10 of these partners live here in Pennsylvania. Large numbers are also customers of the Company. These partners are from all walks of life. Teachers! doctors! stenographers! ministers! clerks! lawyers! executives! and housewives! . . . people from your town, people living on your street!

The Company's annual report was recently mailed to these 95,000 partners. The report contains an interesting summary of the highlights of 1957 and a statistical record of the Company's growth and progress over the past 10 years.

While the extra copies last, **YOU MAY SECURE A COPY AT YOUR NEAREST PP&L OFFICE.**
