

Pa. Poultry Cooking Champ's Receipe Is Chicken Loaf

This is the recipe that won for 16 year old Mary Ann Wilson of Montrose, Pennsylvania, the title of Pennsylvania Poultry Cooking Champion for 1958 was a Chicken Loaf. It was the first time in the history of the contest that a loaf receipe took first prize.

CHICKEN LOAF

- 4 eggs
- 1/4 cup milk
- 1/2 cup chicken broth

- 1/2 teaspoon salt
- 1/4 teaspoon pepper
- 1 cup soft bread
- 1 tablespoon onion
- 3 cups cooked, chopped chicken
- 1 10 oz package frozen peas (Plus carrots (room temperature))

Beat eggs, add milk, and remaining ingredients, order given Mix well Pour into greased loaf pan (9" x 5" x 3") Set in pan of hot water Bake in moderate oven (350 degrees) 45 to 50 minutes, or until done Invert loaf onto hot platter Serve with Mushroom Sauce

MUSHROOM SAUCE

- 1/2 cup sliced mushrooms
- 4 tablespoons butter
- 2 1/2 tablespoons flour
- 1/8 teaspoon salt plus pepper
- 1/4 teaspoon paprika
- 1/2 cup chicken broth
- 1/2 cup milk
- 1/2 tablespoon lemon juice
- 1 tablespoon chipped parsley
- 1 tablespoon Sherry

Saute mushrooms in melted butter Add flour with seasonings and blend thoroughly. Add broth and milk and cook until thickened Then add remaining ingredients.

When making a fabric containing synthetic fibers, don't press the seams until you're sure they need no changing. Sharp creases are hard to press out and sometimes can't be removed. Press with coolest iron temperature first; increase temperature as needed.

Half the meat eaten in the United States is fresh or frozen cuts; the other half is in processed form.

Make Dairying Pay The Record Way

Pennsylvania dairy farmers have some of the best milk producing cows in the world. but they also have some of the poorest. Of the nearly 1,000,000 cows kept for milking purposes in the State, it is estimated that one-third do not produce enough milk or butterfat in a year to return a profit on the feed and labor they require Any herd, large or small, good or poor, would be more profitable if the lowest producers were culled from the herd

Dairymen know a herd of uniformly good cows cannot be developed easily or quickly, but Powers says the average production level of any herd can be improved gradually by effective culling, proper feeding, and careful selection of breeding stock. The producing efficiency of the best herds can be maintained by following these same practices. No great financial investment is necessary, but careful planning and management, and a persistent determination to develop a good herd is needed

In order to cull, feed and breed intelligently, any dairyman must have records of production and feed consumption of every cow in his herd, year after year. There is no substitute for the actual records Guesses and estimates may serve for a time, but worthwhile improvement is seldom obtained without records.

To help dairymen obtain the necessary records continuously over a period of years there are three plans of record keeping available to him. Each is a part of the National Cooperative Dairy Herd Improvement Program Standard DHIA Owner-Sampler, and Weigh-A-Day-A-Month.

For further details on any of the three programs consult your County Agent.

Kuipers Bros., Inc., of New Holland, Pa., have just completed their first DUTCH-MADE package poultry house on the Mervin Hoover farm, located one mile south of New Holland.

This package poultry house offers the poultryman a complete ready-to-use chicken house. It is completely erected on the farms by Herr's Bulk Bin Service. The house is then equipped with all the latest time-saving equipment such as: automatic feeders, waterers, pit cleaners, aisle gathering nests, bulk feed bins, etc. Another main feature of the DUTCH-MADE package house is the built-in egg holding room with refrigeration unit and door.

Due to a double-tiered pit construction and utilizing the ridge-type ventilation, hens are housed at the rate of one bird for every 1 1/2 square feet of floor space. 75 to 80 percent of the droppings are removed automatically by the pit cleaner. This means a much drier house as well as helping to eliminate odor, insects, etc.
