proof of the
DIFFERENCE...

is in the **DRIVING**

Until you take the wheel of a D Series Tractor... until you step up to the low platform settle back in the Easy-Ride Seat, and drive a D-14 or D-17... you'll never know how far tractor farming has come.

Power Director — a great new advance — lets you quick shift on-the-go between ranges. You have eight different speeds ahead... plus live PTO.

Move the big stick forward and you increase ground speed 50 percent... pull it back and you increase pull power 42 percent. In either position, you get fuel-saving performance — no wasteful internal slippage.

Power Director is exclusive with Allis-Chalmers D Series Tractors... and it's backed by TRACTION BOOSTER system that puts the extra pull to work.

You owe yourself a ride on a D-14 or D-17. Why not take it today... we have a demonstrator ready!

TRACTION BOOSTER is an Allis-Chalmers trademark.

Lancaster County DHIA Averages show what can be done on Beacon Feeds

Averages for the 1958 DHIA year just ended in Lancaster County include many records made on Beacon Dairy Feeds. Several of these are in the small, select group that top 500 lbs of butterfat. Some of the 1958 records of Lancaster County Beacon feeders appear below with the 1957 records also given for comparison.

	Cows	1958		Cows	1957	
		Average Milk	Average Butterfat		Average Milk	Average Butterfat
