were steady on about 1200 head or about 525 head less than last week. Sows were scarce this week but the few available sold at steady rate U.S. 1-3 grade barrows and gilts weighing 190-225 lb made 17.50-18.25 with No. 3 and weights down to 180 lb. a 17 Hogs more uniform for weight and grade including 1-2 grade scaling 190-215 lb brought 18.25-19.50. 230-250 lb. hogs made 16.50-17.50. 300-600 lb. sows sold for 14-16 with a few up to 17

SHEEP—Receipts were about 100 head less than last week's 409 head. Woolled slaughter lambs remained at steady rates. Trading was active. Good and choice slaughter lambs made 21-22.50.

CLUB WORK CHANGES

Today's 4-H club program is different. Edward Mintmier, Penn State assistant 4-H club leader, believes there has been more change in 4-H club work in the past five years than there was in the preceding years.

Newsman Comes to Penna

Jack F. Schinagl, Wisconsin University graduate has been named new director of communications in the Penn State College of Agriculture. Schinagl will coordinate information services, including research, art, exhibits, visual aids, publications, press, radio and television activities for the college, according to Dean Lyman E. Jackson.

The veteran newsman comes to University Park from six years with Racine, Wis. advertising agency. He holds two journalism degrees from Wisc. Univ., was Wyoming extension editor, Purdue University bulletin editor, publicity director for the Holstein-Friesian Assn. of America and farm management fieldman for the Federal Land Bank, St. Paul.

even when later evidence fails to reveal wrongdoing. Business men will be in for a grueling ordeal when they face investigating committees headed by Senators Joseph O'Mahoney of Wyoming and Estes Kefauver of Tennessee, and in the House by committees headed by Emanuel Celler of New York and Wright Patman of Texas. The charges against business will make sensational headlines, but it would be well to reserve judgement until all the evidence is in. It never is a good idea to pass sentence before a trial

MEASURE MEAT

An electronic device can measure the size of potential steak or chop the live animal is being developed Thomas King, Penn State extension livestock specialist, explains the device uses high frequency sound waves to determine depth of back fat and eye in cattle and hogs

New Light-O-Matic Light Control For Broilers And Layers

With this device in poultry housing, lights will turn automatically when natural light is insufficient. It can be set up to operate automatically to give light in dark periods by using a time clock. It is placed in a poultry house facing a window, and will turn on the lights on dreary days when they are needed.

Let's Look At The Hard Water Problem!

Lancaster—"It should be a rain and snow it is soft, subject for study by every as it seeps into the ground farm family," says Cliff Le- dissolves and picks up cal- man, water conditioning con- um and magnesium sal- sultant from Century Co., 15 which makes it hard. W. Chestnut St., and here's why

The Department of Agriculture (Bulletin 1978) reports, "very hard water is undesirable for drinking and cooking and is ineffective for cleaning and laundry purposes. It also causes a scale to form in pipes, boilers, and kettles."

Department of Agriculture Bulletin #1978 also states "water for domestic use should be pure, soft and free from excess acidity or alkalinity"

"The water employed in dairy farming", continues Cliff Leaman, "should be clear, colorless, free from iron, taste and odor, sterile and zero hardness."

Hard water in addition to forming scale in boilers, water heaters, piping and fixtures, reacts with caustics to farm milk scum and milk stone. Soft conditioned water speeds up milk house cleaning and keeps down bacteria count

Let us help you with the questions you have concerning your water supply. Here are some typical questions asked us in the past several weeks.

Question: WHAT MAKES WATER HARD?
Answer: Our entire water supply comes from the atmosphere. As this water falls to the earth in the form of

Question: WHAT ABOUT PACKAGED WATER SOFTENERS?

Answer Water conditioning preparations, synthetic detergents and bath salts help in washing clothes, dishes, etc Unless these aids are added during rinsing, hard water again becomes a problem This addition to the rinse cycle in automatic equipment is inconvenient and sometimes impossible

Question: WHAT IS THE COMPLETE ANSWER TO THE HARD WATER PROBLEM?

Answer A fully automatic water softener will provide continuous supply of water soft as rain from every faucet This works with a time clock and selenoid mechanism while you sleep.

Question: HOW DOES WATER BECOME CONTAMINATED?

Answer Water can become contaminated with foreign substances, either by picking up natural impurities in the air and earth or by dumping of sewage or trade wastes into streams, old wells, etc

If you've got a question about water, drop Cliff Leaman a card, c/o Box 40, LANCASTER FARMING, Lancaster, Pa.

For the answer to your water problem, contact Century Co., 15 W. Chestnut St. Lancaster, for free water analysis.
