

Holstein Assn. Claims New Breed Registration Record

The Holstein-Friesian Assn. of America is claiming one of its best years as a breed registry, with 254,867 animals registered in 1958, first time a dairy breed group has passed the quarter-million mark in one year.

At year's end, association spokesmen report, 91,834 cows in 2,405 herds were enrolled in official testing programs.

A sidelight to the year's work is the fact that 1,538 registered Holsteins were sold out of the country, including 1,356 cows and heifers and 182 bulls going to 22 different countries.

Mexico received 930 cows and 59 bulls; Puerto Rico, 123 cows and 30 bulls; Venezuela 107 cows and four bulls; Turkey, 62 females and 17 males; Canada, 30 and 26; Colombia, 30 and four; Dominica, 42 females and Japan, four of each.

The assn. also announced new milking records for five area Holstein herds.

The 25 cow herd of John M. Umble, Atglen, averaged 13,860 lbs. of milk and 510 lbs. of fat on two-milking, 305 day lactation period average.

The eight cow herd of Harvey Rettew, Manheim, averaged 13,503 lbs. of milk and 506 lbs. of fat.

The 15 cow herd of Earl L. Umble, Atglen, had a 12,912 lb. of milk and 478 lbs.
