

ays Martin N. Kaplan of Fountainville, Penna.

“High egg production maintained... fewer culls”

Since using AUREOMYCIN® in the feed of our breeder chickens, we have had healthier flocks, more consistently high egg production and fewer culls,” says Mr. Kaplan who is manager of Fountainville Poultry Farm and Hatchery, producers and sellers of table eggs, hatching eggs, baby chicks and started pullets.

AUREOMYCIN is a tonic for our birds—and on more than one occasion has controlled outbreaks of blue comb in our pullets. We’ve tried other antibiotics on an experimental basis but have con-

sistently returned to AUREOMYCIN. AUREOMYCIN is excellent for flock health throughout the entire growing and producing periods. In addition to providing protection against blue comb and respiratory disease, AUREOMYCIN helps settle birds after they are subjected to stress conditions.”

AUREOMYCIN is the *proved* antibiotic for breeder and layer rations. Ask your feed manufacturer or feed dealer for feeds containing AUREOMYCIN. Feed continuously. American Cyanamid Company, Agricultural Division, New York 20, N. Y.

AUREOMYCIN is American Cyanamid Company's trademark for chlortetracycline.
