Potato Stocks Near Record Low

Stocks of potatoes in stocks of Penna. growers and local dealers on March 1 were estimated at 1.4 million cwt. by the state Crop Reporting Service.

This total means consumption during February of 1.4 million cwt, compared with last year's February consumption of 900,000 cwt potato production in the state was the highest since 1954, but rapid use has left stocks at only 18 per cent of the output.

The March 1 stocks are held in the U. S. on March 1 amounted to 58.2 million cwt, according to the U. S. Crop Reporting Board.

This is 12 per cent below March 1, 1958 stocks and 11 per cent above the 1949-57 average of 52.3 million cwt.

Sloat Says - Spray Wild Garlic

Assistant County Agent Harry S. Sloat reminded county farmers this week that spray control of Wild Garlic is best obtained from now until about April 5, while clovers are dormant and while spray materials will not affect other vegetation.

Wild Garlic in pastures is one of our most vicious weeds, Sloat points out. The plant pest reproduces by bulblets and seed, coming up in the fall in pasture and meadows, and it makes further growth during the spring months.

Since spray control measures kill out only the green part—showing at this time above the ground—it will take approximately 3 years to clean up sprouting seed and bulblets in the soil.

Dairy cows when turned on pasture containing garlic generally produce off-flavor or garlicky milk. Each spring much milk is returned to farmers because of this off-flavor.

The ester form of 2-4-D, applied at the rate of 1-1½ lbs. actual acid per acre will give control. This should be mixed with 15 - 20 gallons of water and applied with a low-pressure weed sprayer,

within the next 10 days. This is a hormone which causes a very multiplication of plants and does not harm insects or humans, Sloat said.

YOU DON'T NEED A CLUTCH— JUST A LIGHT FINGER TOUCH!

FORD SELECT-O-SPEED ALL-PURPOSE DIESEL TRACTORS

Hydraulic power does the actual shifting, but it's controlled by this handy lever under the steering wheel.

Now, for the first time, you can shift on-the-go to any speed you want, any power you need, by a simple touch of your finger! Ford Select-O-Speed All-Purpose Diesel Tractors give finger-tip, clutchless shifting to any of 10 forward and 2 reverse speeds so you can match rugged diesel pull-power and speed exactly, instantly, to changing field conditions. And with Ford's new independent PTO, you engage or disengage the PTO shaft on-the-go, at any time. Come in and test drive a Ford Select-O-Speed All-Purpose Diesel Tractor today—see what it can do for you!
