SAVE FARM BABIES

A little extra attention will save baby lambs, pigs or calves born in cold weather.

Everybody Works When Mother Gets a Job

When mother is a wage-earner, household tasks become family affairs. This is especially true with regard to food preparation and associated chores. Francena L. Nolan found in a study of employed rural homemakers. Mrs. Nolan, rural sociologist at the Pennsylvania State University Agricultural Experiment Station, found many families apparently had pretty well solved the problems arising when the mother works outside the home. On the other hand, a considerable number of the parents had misgivings with regard to undesirable effects that absence of the mother might have on the children

HANDLING ELECT. CORDS—which causes corrosion on the prongs.

Always grasp the plug and not the electric cord when you disconnect a cord from an outlet. Don't jerk, twist, or wiggle the plug to loosen it. And always disconnect an appliance cord from the convenience outlet before disconnecting it from an appliance. This prevents sparking

If you have any shrubs which have never been pruned and which have a lot of dead wood, cut the whole shrub off two to three inches above the ground and fertilize with two handfuls of 5-10-10 worked into the soil and watered well.

Sewing machine come in different sizes. The make and of the sewing machine determines the type to buy. The weight of fabric to be sewn determines size. To be sure you have correct needle, tell the person the type of fabric you have and the weight you plan to sew.

in 1959 it's HONEGGER

LAYERS

Here's what you can expect!

HIGHER INCOME. In the 1957 - 1958 Florida Random Sample Test, Honegger Layers won with an income of \$4.97 over feed and chick costs.

HIGHER LIVABILITY. In the 1957 - 1958 Central New York Random Sample Test, Honegger Layers had 92.2% livability from 7 to 500 days.

HIGHER EGG QUALITY. In the 1957 - 1958 Texas Random Sample Test, Honegger Layers averaged 97.1% Grade A or better for all eggs laid.

LARGER EGGS. The same birds that placed first in the '57 - '58 Florida Random Sample Test averaged over 80% large and extra large eggs.

GREATER FEED EFFICIENCY. Honegger Layer entries in all recently completed Random Sample Tests, averaged only 4.6 pounds of feed per dozen eggs.

HIGHER PRODUCTION. On the farm tests show that Honegger Layers on a hen housed basis average 255 270 eggs under good management.

For every dollar invested in limestone, experiment stations conclude, three dollars are returned in increased crops. Sometimes the ratio climbs to one to 15.

This explains why the Government pays about half the cost of applying limestone, help is desired. The Government is convinced that farmers cannot afford to not use limestone.

Where else does one dollar spent bring you at least three in return? Does pay to use limestone?
