**Sustained High Production...**

with the **3 BEACON KEYS** to lower cost milk

Every dairyman is to increase milk production per cow. Research come new feeding programs, designed to make the milk a cow is bred to produce. Basically, the Beacon is a three-fold plan.

Make available all nutrients required by the cow not only to make milk but to replenish and maintain body reserves. This is one key to sustained high production — more persistent performance during the latter part of the lactation. *This is the milk that makes the difference.*

Provide uniform and palatable top quality feeds that help keep cows on feed—get the milk making nutrients into the cow. High producing cows have inherited ability to utilize large amounts of feed efficiently over maintenance requirements. *Increased coarseness in texture is one of the improvements in the new Beacon Feeds which helps achieve this goal.*

Provide the expert advice and counsel of highly skilled Beacon Dairy Advisors. These men, backed by Beacon Dairy Research, are soundly trained in the business of modern dairy farming and latest dairy management methods. They are experienced in helping many good dairymen produce lower cost milk.

**YOUNG GIRLS' DRESSES**

The best dress style for girls, one to two years old,

is one that hangs straight from the shoulders and has no waistline, says Miss Thelma Baerl, Penn State extension clothing specialist. Often a dress made in this style has a yoke of smocking and the fabric is gathered to make the skirt.
