LONGER?**

Feeders filled with MA-CO LAYING RATION. High efficiency helps feed consumption low... waste and guesswork of old methods. High digestibility of all required nutrients take off the many stresses of laying. Assures steady growth and production. Don't look at the price at the feed cost per doz. eggs. It's the first step to becoming a poultryman

ASS with GRAIN

More Milk All Summer Long

Dairyman likes the boost in milk production his lush pasture. He knows it means more dollars per cow check . . . and at lower feed cost per cwt. Dairy men know, too, that pasture can't do it alone. Dry feed . . . including grain . . . is needed for laxative effect. This supplementary feeding helps hold body weight, keeps them in better shape up to inherited capacity. Pasture quality changes, too, as the season progresses become dry and less palatable, cows graze weather gets hotter. Supplementary feeding becomes more important then. I am glad to recommend a specific program suited to your pastures. The Beacon Pasture Feeding has helped thousands of dairymen produce more profitably. Chances are it can help you, too.

BEACON

"GO 'WAY, YOU'RE NO JERSEY", seems to be the attitude of the alarmed Jersey mother in the background, as her Jersey-Charolais offspring stops by at dinner-time in the barn at the Paul Bucher farm, Peach Bottom RD 1. The week-old calf stands 33 inches at the shoulders, well over half the height of his apparently disgruntled mother. Bucher milks 44 head of registered and grade Jerseys on the 168-acre farm, east of New Texas. He reports he wanted the cross-bred calf for family beef, having seen a herd of the French dual-purpose cattle two years ago. When he found his artificial breeding service could supply Charolais sires, he decided to try the cross. Actually this scene is deceiving, as the Jersey mother is still quite fond of her over-sized baby, and he no longer claims her. —LF PHOTO

Promise

(From page 1)

gone), but more and more people are offering to assist in any way possible the Soil Conservation District to establish soil and water conservation practices on more and more of our 7900 farms.

Soil Stewardship Sunday is being observed by an increasing number of ministers in rural as well as urban churches. This is indeed encouraging.

An attempt to emphasize the observance of Soil Stewardship Sunday was made as early as 1952, working through the United Churches of Lancaster Co. Continued emphasis has taken varied forms since then. Progress has been slow but gratifying.

We feel conservation is everybody's business and that does not exclude our ministers, whether rural or urban.

There are six inches of precious top soil that lie between us and starvation. The top

three inches are those that build and maintain homes, schools, churches and roads of the community. The bottom three inches barely sustain life. We need to protect the top portion if we are to enjoy an abundant life.

In the First Chapter of Genesis, we read that following creation, man was given dominion over all things and that he was to replenish. Dominion, not destruction; To replenish, not deplete. God maintains ownership, man is his servant, his steward.

Many years ago, God put a rainbow in the sky. To the ancient Hebrew it was the promise of hope. God would never again destroy man and life from the earth. God has never broken his promise.

He is faithful! He will never destroy life from the earth!

But man possesses the power and the ability to destroy himself and all life. He can do it by being a poor steward to the soil, timber and minerals God has given him in the good earth.

SELECT-O-SPEED!

Select-O-Speed permits finger-tip clutchless shifting throughout entire range of 10 forward, 2 reverse speeds while on-the-go and under load! You'll save a lot of time-wasting stops, get a lot more work done.

Yes, shift up or down with a touch of the finger to match pull-power and speed exactly, instantly, to changing field or crop conditions. And with completely independent PTO, you can engage and disengage the PTO shaft while on-the-go . . . all for the easiest, most efficient tractor performance you've ever seen.

STOP IN — see and drive a new Ford Select-O-Speed Tractor!
