Few choice vealers 35, stan-
 dard and good grades 26-34.
 Cull and utility 15-26. Ship-
 ment good and choice 702 lb
 stock steers 33,

**Wool Industry Celebrates
 200 Years in United States**

Two hundred years of
 wool manufacturing in this
 country will be celebrated
 throughout the United States
 during 1960, it was announ-
 ced recently by Woolens and
 Worsteds of America, Inc.
 The observance will mark
 the beginning of American
 mill operations for wool cloth
 production.

The bicentennial celebra-
 tion will be a high point of
 the long range, industry-wi-
 de American wool informati-
 onal program being conduc-
 ted by Woolens and Worsteds
 of America. The association
 represents every part of the
 industry from sheep to shop
 including wool growers, tex-
 tile mills, combers, carders,
 spinners, weavers, knitters,
 dyers, finishers, other proces-
 sors, designers and manufac-
 turers of American-made
 wool products, and wholesal-
 ers and retailers

Pr.or to 1760, the Ameri-
 can wool industry was a flou-
 rishing homecraft business,
 with the first early American
 home-spuns loomed in hun-
 dreds of homes throughout
 the land. George Washington
 himself was among the ear-
 liest wool "manufacturers,"
 having hundreds of yards of
 domestic woollen cloth wov-
 en every year at Mt. Vernon,
 where he also raised the she-
 ep for the wool fiber

Better Pullets - Lower Costs - Less Labor

Our New "EARLY BIRD ALL MASH DEVELOPER PELLETS" will give you
 developed and slowly matured birds. Birds that will have the capacity
 really handle feed when they come into production. MORE LARGE EGGS
 CCKER.

The Program For Light Breeds

5	Chick Starter — Full feed	0-6 Weeks
32	All-Mash Grower — Full feed	6-12 Weeks
41	All Mash Developer Pellets (14-15 lbs daily per 100 pullets)	13-18 Weeks

When Put Birds on Laying Feeds

FE: 18-19 pounds total feed intake should bring birds into lay and pro-
 all nutrients required for a real bird with bet'er than average LAYING
 LITY and LIVABILITY. This program DOES NOT require the extra 25
 cent feed intake necessary on the extreme high fiber feeds. A hopper
 ing on range ONCE daily will save labor and give you a very uniform

nd immunization against the vari-
 types of coccidiosis is provided.

**K-137 KimberCHIKS® lead in
 EGG QUALITY**

K-137 Kimberchiks were entered in all six of
 the Random Sample Tests that made interior
 egg studies in 1957-58, and K-137's led all other
 nationally sold strains for albumen quality, as
 shown in the graph above. K-137's also ranked
 first in egg size... and were right at the top for
 livability and egg production. Please ask for
 free booklet.
