**Control Beetles
 On Bean Crop**

The Mexican bean beetle
 is one of the most common
 insects found on beans
 grown in field or gardens

The adult beetle is hemis-
 pherical in shape, about one-
 fourth inch long, yellow to
 copper-colored, with 16 black
 spots on the wing covers
 The larvae are yellowish-
 orange in color and covered
 with black spines.

Both the adults and larvae
 feed on the underside of
 bean leaves and cause a rag-
 ged, lace-like damage that
 turns brown with age.

Assistant Chester County
 Agent Frank E. Bortz says
 best control is obtained if
 the first application is direct-
 ed against adults, and before
 eggs are laid. Direct the dust
 or spray to the underside of
 the bean leaves.

For dusting, use either 4
 per cent malathion, five per
 cent methoxychlor, or one
 per cent rotenone. As a
 spray, use 2½ tablespoons
 of malathion 25 per cent
 wettable powder, or three
 tablespoons of methoxychlor
 50 per cent wettable powder,
 or rotenone emulsion, at the
 directions of the manufactur-
 er, for each gallon of water.
 Repeat applications at ten
 day intervals until insect is
 under control.

**Senior Extension Issues
 Call for Square Dancers**

The Lancaster County Organization meeting for
 Senior Extension Club mas the team will be at 8 p m.
 issued a call to ail interested Tuesday in the Farm Bu-
 square dancers to join the eau auditorium, with all in-
 organization in forming an terested persons urged to
 Exhibition Team to compete attend, whether they can
 in the 1960 State Farm dance or not, according to
 Show Square Dance festival Janet Risser, club secretary.

Simplify your spray schedule with...

**This One insecticide controls
 all major fruit pests
 including aphids and mites**

Now, you can use one chemical to control every
 major deciduous fruit insect pest... including aphids
 and mites. Guthion all alone provides equal or
 better control than any combination of chemicals
 formerly required. Guthion keeps fruit insects under
 control better between sprays, too, because it stays
 on the job... keeps working from one cover spray
 to the next. Order Guthion today!

**A Message
 - TO -
 Poultrymen**

Do you know that the feed manufacturers who are going
 into the poultry business by contracting with the poultry-
 man on a commission basis are partly responsible for
 your severely depressed egg prices?

These firms are rapidly expanding their contract flocks.
 This increased egg production floods the market depressing
 the egg prices, sometimes even below the actual cost of
 production.

When a feed company loses money by contracting it usual-
 ly cannot follow the present decline in feed prices.

Grubb Supply Company does not compete with you by
 contracting. If you are an independent poultryman it will
 pay you to check feed prices with Grubb Supply Company.
 If you want to stay in the poultry business your best bet
 is to feed Garden Spot Feeds, manufactured by Grubb
 Supply Company in Elizabethtown. You cannot buy better
 quality. And Garden Spot Feeds are priced to keep you in
 the poultry business during these crucial times.

If you are interested in lowering your production costs call
 us today.
