FARM SAFETY WEEK — JULY 19 THROUGH 25

WHEREAS, Many hundreds of farm folks meet accidental deaths or serious injuries on farms in our Commonwealth each year; and

WHEREAS, In the past year more accidental deaths occurhed among farm families in their homes, barns and fields than occurred among the workers in any other major industry; and

WHEREAS, The effect of accident-prevention programs has been that our farm residents, through attention to safety education, can greatly reduce accidents and the resultant loss and suffering; and

WHEREAS, We must once again impress upon our rural citizens an undertanding and awareness of the dangers inherent in their vocations;

NOW, THEREFORE, I, David L. Lawrence, Governor of the Commonwealth of Pennsylvania, do hereby proclaim the week of July 19 to 25, 1959, to be Farm Safety Week for Pennsylvania, and I call upon my fellow citizens to participate in this campaign to make every day a safe day on the farm.

GIVEN under my hand and the Great Seal of the State, at the City of Harrisburg, this fourteenth day of July, in the year of our Lord one thousand nine hundred and fifty-nine, and of the Commonwealth the one hundred and eighty-fourth.

DAVID L. LAWRENCE, Governor

get"

National Farm Week was first observed in 1944 when the National Conbe made to stamp out accidents on America's farms.

The group decided a special observance should be set 100,000 farm person aside to stress accident pre- Last year the number of the stress accident prevention. Thus Farm Safety fallen to around 57 Week was born-and it has been observed annually ever injuries on the fact nine vene had since.

Soffit Block Floor

Offer Low Cost Fire - Safe Construction For Farm Buildings

Soffit-Block Floor Systems Have These Advantages:

- Economical
- Fire Safe
- Savings from low upkeep cost and low fire insurance rates
- Capable of carrying great loads
- Longer life than many other types of construction

Safely and economically, you build farm buildings for a lifetime with concrete masonry. Select a conc rete block of proven durability, ready availability and low cost — Kurtz Bros. Concrete Block for walls and Soffit Block for floors and ceilings.

The design and ship concrete Soffit-type block made continuous of insulating air spaces laid tight together. Pro ing flanges provide ? for pouring the steel forced concrete joist, ing an integral slab com tion that is light in v The result is firesafe struction at low cos will last a lifetime.

Match a new Oliver—twine-tie or wire-tie—with any other machine in your small, rough, patchpattern fields. There's where it gobbles up the windrows, bales up to ten tons per hour as easily as on the straightaway.

You get Oliver's exclusive "pivot-balanced" drive ... and exceptionally short coupling. Just follow the windrow with the rear tractor wheel—even around the sharpest corner. Your Oliver gets the hay...

saves hours of time when time counts most. Here are balers with everything: new, leaf-saving pickup...swinging drawbar for safe transport... overrunning clutch (extra)...protective devices for

all important units. You can adjust bale length in seconds—from 12 to 50 inches. Twine- and wire-tying units are easy to interchange, and an engine (extra) is easy to mount when desired.
