Angus
1. Wenrich; 2. Darvin Boyd, Ephrata R1; 3. Joyce Nolt; 4. John Zimmerman, Reinholds R1; 5. David Zimmerman, Reinholds R1.

Hereford
1. Janice Showalter; 2. Leona Augsburg, Reinholds R1; 3. Irene Bollinger, Denver R2; 4. Darlene Ebersole, Ephrata R1; 5. David Heisey, Sheridan R1.

Showmanship
1. Joyce Nolt; 2. Janice Showalter; 3. David Zimmerman; 4. Leona Augsburg.

Fitting
1. Joyce Nolt; 2. Janice Showalter; 3. Irene Bollinger
4. Darvin Boyd.

Lancaster Farming, Saturday, September 26, 1959—11

Use the lining of a coat or suit, jacket as a guide to quality, suggests Mrs. Mae B. Barton, Penn State extension clothing specialist. The lining should be firmly and smoothly attached and made of a closely woven, colorfast fabric. Lining seams should fall in the same places as the seams of the outer fabric. There should be a pleat at least three-fourths inch deep in the lining across the back of a garment. The pleat will allow for ease.

Modern science has come up with an answer to the iron rust in water supply problem. Henry Wooding, Penn State extension agricultural engineer, says that plastic pipe is a good replacement for badly corroded or rusty metal pipe, and it can be installed rather easily.

Lancaster Farming advertising brings results.

FARMERS SUPPLY

137 EAST KING STREET LANCASTER, PA.

MR. DAVID RESSLER

The Corn Champion

USES

Muncy Chief H780

Yields 181.7 bu. Shelled Corn per Acre

In 5-acre corn contest on farm using normal cultivation and fertilization during the 1958 season.

Mr Ressler had his Muncy Chief H780 corn planted on alfalfa sod, stalks stood 1 foot apart and he used 15 tons stable manure and 300 lb 5-10-10 fertilizer to the acre in securing this yield. He had 13,500 plants to the acre. Calculated yield at 18,000 plants per acre would have been over 200 bu. shelled corn to the acre.

ORDER NOW FOR THE 1960 SEASON

There is MORE MILK in a Bag of PIONEER

It pays to feed PIONEER! Dairymen in every state east of the Mississippi have found that PIONEER increases both milk and fat production... and frequently, at the same time, reduces feeding costs. PIONEER also helps promote improved herd health—reduces breeding and calving troubles.

There's a PIONEER dairy feed to suit your needs exactly. Try PIONEER. You'll find out why dairymen stick with PIONEER for years and years. It's been the outstanding dairy feed for over fifty years!

(From page 1)
day with a 35 and 20 bid and reported picking up several crops General got into the act with a bid of 32 and 20 cents, but apparently did not move very many crops.

By Tuesday buyers were steadily picking up some leaf in most sections of the county at reported prices of 30 through, 30 and 30, and 35 and 20 There seemed to be a price to cover almost any situation and the buyers were watching closely for shed burn.

At the middle of the week the activity rose to fever pitch with all the major companies in the field. The price seemed pretty stable at 35 and 20. One company reportedly made a few offers of 30 through, but went back to the 35 and 20 figure when they met farmer resistance.

Even in the face of high labor costs, many farmers feel that with the "clean" crop of this season the sorted price would pay for the extra work involved.

Feeling among farmers generally was that the weekend would see most of the 1959 crop in the hands of the buyers, making this one of the earliest buying seasons in the history of the County.
