

Housecleaning
 (From page 4)
 immediately for the reason your clean floors provide a light coat of a rigid surface like plastic. Rigid chip and wear in and may turn yellow.

A KIT FOR SPOTS AND STAINS
 rid of spots and isn't always easy. But work spot quickly and do job if you have all spotting materials in ready for use. Any spot removal kit need four kinds of plus the equipment

to work with. Keep a small bottle of liquid detergent in your kit. This you will work into many stains as the first step in removing them.

You also need solvents for hard-to-take-out grease spots. Carbon tetrachloride and methyl chloroform are two nonflammable varieties. But use them outdoors or in a room with windows open, since the fumes are poisonous. Keep children out of the room as you work and store your spot removal kit safely out of their reach.

You'll need some bleaches to use mostly for stains that aren't greasy. A 3-per cent hydrogen peroxide that you buy at the drug store for bleaching is handy because it is safe for all fibers. Use this bleach with sunlight or

a warm iron to do the best job.

You may already have chlorine and sodium perborate bleaches on hand. Use them for the fabrics designated in their directions.

You'll need something to absorb fresh ink stains on materials you can't wash. Either cornstarch or corn meal will do this as the first step in taking out the stain.

Keep sponges, clean soft cloths, white blotters, an eye dropper and a bowl not made of metal in your stain removal kit.

If you have large chairs or canvases made of wood slats or redwood, they may be bulky to store folded then use as extra television chairs. Some may fit well in a bedroom or recreation room or family room for everyday use.

You may want to repaint or seal the wood and cover the cushions to go with room colors.

With end-of-summer furniture sales, you may want to pick up some pieces to serve both indoors and outdoors.

Rattan and wicker furniture is usually light weight and small enough that it will go nicely in living room, bedroom or dining room if you are buying pieces be sure to check that you can sit comfortably in them. Not all pieces are well designed.

Tubular metal chairs, double seats and chaise lounges that are covered with plastic roping, webbing

If you're shy of furnishings and want to keep costs low, outdoor furniture may suit your needs.

The type of wood used and the labor involved help determine the final cost of most paneling, states Miss Dorothy C. O'Donnell, Penn State extension home furnishings specialist. Measure wall area carefully, and get several estimates of cost. To compare the expense of paneling with other types of wall covering, figure total costs of paneling and each type of wall covering over their probable lifetimes.

Keep Records and You'll Keep DEKALB LAYERS

HIGH EGG PRODUCTION
 Fewer seasonal laying slumps and a high rate of production result in larger, more consistent profits.

EGG SIZE THE MARKET PREFERS
 Plenty large... but not too big... describes DeKalb eggs. They're just what the customer wants.

LIVABILITY
 From baby chicks to mature hens and through a long laying period, DeKalb livability is tops.

FEWER CULLS
 DeKalb Chix are bred to require less culling because birds are almost identical genetically.

REDUCED FEED COSTS
 Many poultry raisers have happily watched feed costs go down after switching to DeKalb layers.

HIGH INTERIOR QUALITY
 Firm, upstanding whites and big, golden yolks give DeKalb eggs an appeal that whets appetites.

STRONG SHELLS
 Fewer broken eggs in handling means more eggs to sell. DeKalb eggs are ideally shaped, too.

For years, DeKalb has employed some of the most skilled scientists in the world to work at producing the greatest layer in the world. Many spokesmen for the poultry industry believe this goal has been achieved. But, even if this is so, technical genetic work will never cease at DeKalb.
