

4-H Leaders

(Continued from page 1)
 4-H club meetings more interesting? interests of club change from ten to What kinds of commu-vice can clubs engage how can good members

who grow out of the age group be taught to be good leaders?; How can the member over 14 be kept interested in the work of the club?

Dr. Smith concluded his remarks by quoting a Chinese philosopher who said, "The most satisfying experience of my life was hearing a little girl singing as she walked down the road after having asked me the way."

In other business of the evening, Miss Grace Nolt, Columbia R1 was elected to replace Mrs. Benj. G. Sheaffer, Lititz R2, on the council executive board Mrs. Sheaffer has been active in 4-H club work for 27 years. Other members of the executive board in addition to Miss Nolt and president Longecker are, vice president Milton Brubaker, Lititz R1; secretary-treasurer Mrs Dorothy Frey, Stevens R1; Mrs. Walter Overgaard, Lancaster R4; Clarence Keener, Manheim R3; and Mylin Good, Man-

Shade Trees Can Be Fed In The Fall

Some of the fertilizer applied now will be used before the ground freezes and some will be available when growth starts next spring.

Mature lawn and street trees should be fed about every three years. Young trees need annual feeding if you want them to grow rapidly

If garden chores pile up on you in the spring maybe you can get some of them out of the way now. Shade trees can be fed in the fall just as well as in the spring, and October is a good time for it.

A high nitrogen fertilizer, such as 10-6-4, is used for most shade trees. Apply the fertilizer in a series of holes which extend from the drip line of the branches to the trunk. The holes may be made with a crowbar or electric soil auger or with a shovel. They should be 8 to 12 inches deep and two to three feet apart.

heim R2.

Reporting as chairlady of the committee to draft constitution and By-Laws was Mrs. Jean Thomas, Manheim. County Agent Max Smith and Assistant County Agent, Winthrop Merriam made brief remarks to the group.

Two to four pounds of fertilizer for each inch of trunk diameter is used for the large shade trees. Smaller trees take one pound per inch of the diameter.

The next meeting, designated the annual meeting, is scheduled for January.

Soak the area down after feeding to avoid injury to the roots.

MUNCY CHIEF H-780
 5 acre corn contest farm using normal nutrition and fertilization during the 1958 season yielded 181.7 bu. of corn per acre. For best yield, buy and Muncy Chief H-780 for the 1960 season.
