county agent. The direction under the direction of Hooper, president, Lancaster Livestock and auctioneer was abashed.

Myron Lacey, Livestock Extension Specialist at Pennsylvania State University and Lancaster Livestock Extension Specialist from the Pennsylvania State University previously picked Lancaster county entries for county roundup. They were home on Tuesday to await the trip to Harrisburg for the annual show at Harrisburg. The 14 Angus Herefords will be more gentle handling before representing the county in state-

wide 4-H competition. The two shorthorns in the club were considered by the committee and the judges to be too well finished to take the two more months of intensive feeding until the January show.

The twenty seven young people who will make the trip to Harrisburg to show their steers are as follows:

Angus (lightweight) — Bobby Landis, Horseshoe Rd; James Hess, Manheim R1; Johann Erb, Mt. Joy R1; Joyce Nolt, Reinholds R1; and William Hackman, Elizabethtown R3.

Angus (mediumweight) — John Frey, Quarryville R2; and Arlene Long, Manheim R4.

Angus (light heavyweight) — Glen Foreman, Manheim R4; Magda Frey, Quarryville R2; and James Groff, Lancas-

ter R7. Angus (heavyweight) — Rose Marie Linton, Quarryville R2; Eugene Hosler, of Manheim R3; Nancy Landis, Strasburg R1, and Martin Wenrich, Denver R2.

Keep Records and You'll Keep DEKALB LAYERS

HIGH EGG PRODUCTION

Fewer seasonal laying slumps and a high rate of production result in larger, more consistent profits.

EGG SIZE THE MARKET PREFERS

Plenty large...but not too big... describes DeKalb eggs. They're just what the customer wants.

LIVABILITY
From baby chicks to mature hens and through a long laying period, DeKalb livability is tops.

FEWER CULLS
DeKalb Chix are bred to require less culling because birds are almost identical genetically.

REDUCED FEED COSTS
Many poultry raisers have happily watched feed costs go down after switching to DeKalb layers.

HIGH INTERIOR QUALITY

Firm, upstanding whites and big, golden yolks give DeKalb eggs an appeal that whets appetites.

STRONG SHELLS

Fewer broken eggs in handling means more eggs to sell. DeKalb eggs are ideally shaped, too.

For years, DeKalb has employed some of the most skilled scientists in the world to work at producing the greatest layer in the world. Many spokesmen for the poultry industry believe this goal has been achieved. But, even if this is so, technical genetic work will never cease at DeKalb.
