At World Agriculture Fair

USDA To Show Insect Control

Man's newest scientific weapons in his age-long fight to exterminate or control destructive insects — such as the housefly, mosquito, grasshopper, cockroach, wire worm and others — will be demonstrated at the United States Exhibit of the first World Agriculture Fair which will be held in New Delhi, India, Dec. 11 to Feb. 14, 1960.

In one of 24 major displays, the Atomic Energy Commission will show how scientists use radioactive "labels" to "tag" destructive insects and then follow their migrations.

The Fair is the first international fair to be concerned exclusively with agricultural progress and productivity, and will be the largest Fair ever held anywhere in Asia. Besides the United States exhibitors include the Soviet Union, Poland, East Germany, Mongolia, Burma, Ceylon, Pakistan, the United

Arab Republic, South Vietnam, Afghanistan, India, the Food and Agriculture Organization of the United Nations. Communist China also reportedly will participate.

The United States is sending some of its leading scientists to New Delhi to supervise the Atomic Energy Commission's exhibit. They will carry out actual experiments jointly with eminent Indian physicists in full view of an anticipated 3,000 visitors from every part of the Orient.

The central theme — Friendship, Freedom, Family — are represented a series of exhibits being organized by the Department of Agriculture, the Department of Commerce, the United States Information Agency and Atomic Energy Commission.

Greatest convenience of a Wife's time... A KITCHEN TELEPHONE

A kitchen telephone is the most time and labor saving convenience you can give your wife. There isn't a wife today who couldn't use the time and energy that's saved each day by a kitchen telephone. No more running to answer a ringing phone in another part of the house, and no missed calls either. Inexpensive too, only pennies a day.
