

## Baby Beef Club Elects Foreman

Glenn Foreman, Pennsylvania's two-time baby beef champion was elected president of the Red Rose Baby Beef and Lamb Club Wednesday night at the Brecht school, Lititz Pike, Lancaster.

Foreman, the Manheim R3 showman and varsity wrestler at Manheim Central High School, succeeds Darwin Boyd, Ephrata R1, who was elected game leader for the group.

Other officers elected at the Wednesday night meeting were Marlin Cassel, of Manheim R1, vice president; Nancy Landis, Strasburg R1 secretary; Jean Miller, Elizabethtown R1, assistant secretary; and Wilbur Hosler, Manheim R3, treasurer.

Other officers include Janet Frey and J. David Lapp, song leaders; Darwin Boyd and Mary Jane Herr, game leaders, and John Good and Judy Nolt, news reporters.

Club leaders chosen were Mylin Good, Manheim R1; Elvin Hess, Strasburg R1; Fred Linton, Quarryville R2; Victor Longenecker, Elizabethtown R3; A. R. Nissley, Manheim R4, and Harry Shwalter, Reinholds R1.

Experience is the difference between keeping your chin up or sticking it out.

Now is the ideal time to apply New Jersey Green Sand and Calphos to grain and hay fields. If interested in natural program of farming it will pay you to investigate and use these natural colloidal marine deposits.

Any quantity available Bag or Bulk Ton or carload lots.

Also available our complete soil builder for lawns, garden and all row crops. Try and compare.

## County Council

(From page 1)

take one or more projects throughout a year, raising their projects by themselves. Each project is completed by a roundup at the end of the season. At the roundup the members receive awards for outstanding work.

The activities of the county 4-H are controlled by the county council. At present the council is composed of 16 members, eight from home making clubs and eight from the agricultural

clubs. With the members coming from all sections of the county, the council meets once a month to plan the many activities enjoyed by the 4-H'ers and their friends.

County wide activities of the past year were as follows: 4-H Field day at Long Park in July; a combined square dance and Halloween Party in October; Rollerskating party in November; 4-H play, titled "Father Knows Best" in the Hempfield School in November; combined square dance and Christmas party in December; rollerskating party in

January and the annual leaders banquet in Mount Joy in February.

Included in the planned activities are a roller skating party on March 18, a Spring Jamboree to encourage all 4-H'ers to invite their friends to join 4-H and make it another wonderful year of learning, living and serving.

The council members, who are guided by the home economics and agriculture extension leaders, will conclude their successful year of experiences and new adventures this spring when a date will be set for the offi-

cers training meeting. At that time new council will be elected.

We wish "lots of luck" to the new council and 4-H members.

## STOP PAINT DAMAGE

A common cause of blistering, scalding, or peeling paint is moisture, according to Penn State extension agricultural engineers. Interior moisture is worse than that from outside. The engineers say that this moisture can be prevented from entering the wall by using a vapor barrier on the inside wall.

# 1960 EARLY BIRD REPLACEMENT PROGRAM

### ★ ECONOMY OF PROGRAM

Basis present feed costs you can grow Leghorn pullets to 20 weeks of age on a feed cost of 75 cents or LESS.

On the EARLY BIRD PROGRAM it takes about 19 pounds of feed or less to grow a Leghorn pullet to 20 weeks.

1. The Early Bird feed required on growing the 1958 Random Sample pullets for the Pennsylvania Egg Laying Contest was 19.1 pounds.
2. On the 1959 State contest pullets, feed required was 19.0 pounds.
3. On the Claude Hess Farm, R. D. #2, Ephrata: 5,000 pullets were grown in 1959, on 18.9 pounds of feed.
4. Mr. Walter Ames of Narvon, Penna., raised 2,000 exceptionally fine pullets to 20 weeks of age on 17.32 pounds of feed.

### ★ ESTIMATE OF FEED REQUIRED

This 19 pounds of feed consists of approximately the following quantities.

### ★ CONFINEMENT PROGRAM

Early Bird Starter	2.0 pounds
Early Bird Grower	8.5 pounds
Oats	8.5 pounds
	19 pounds

### ★ RANGE PROGRAM

Early Bird Starter	2.0 pounds
Early Bird Growing Mash	6.8 pounds
Oats	10.2 pounds
	19 pounds

At present costs for feed in ton lots, this gives a feed cost per pullet of 75 cents using bagged feed.

SOME OF OUR CUSTOMERS HAVE GROWN PULLETS FOR AS LOW AS 65 CENTS FEED COSTS AT 20 TO 21 WEEKS OF AGE.

### ★ MANAGEMENT & DISEASE CONTROL PROGRAM

For details see our booklet on Management, available on request.

## HAVE YOU WATCHED PULLET PLACEMENT FIGURES LATELY?

They are substantially lower all over the nation.

Perhaps it is better to start your replacements NOW rather than wait until everyone jumps on the bandwagon. If we can be helpful, please contact us.

*"The Way The Twig Is Bent....!"*

Remember:

Your FUTURE egg production costs and your flocks PERFORMANCE will be determined by the way you feed and manage your replacement stock NOW.

Don't be penny wise and pound foolish! Do it right!
