## \$726 Per Acre

The 119 acre farm offered for sale at public auction Tuesday, April 5, by Jonas Zook of New Holland R2, was bought by John Yost, Narvon R2, for \$86,394 or \$726 per acre

Three cows in the 50 cow Zook herd topped the \$500 figure One grade cow and calf brought \$540 00 Seven cows brought \$400 or over. The average on thirty three cows was \$386 00

Other farm items sold by Carl Diller, anctioneer, inpril 13 — 730 - Guernsey cluded an elevator, \$185;
4-H club reorganizational corn picker, \$300, forage meeting in the Solanco harvester, \$1,660; hay fan, \$390; pair of horses, \$467 50 Four other horses averaged over \$200 each, and a grain drill, \$310.

## Crop Acreage is that comparison: Farm Calendar April 15 - 7:30 p.m. - Coun- Largest Part Of

What kind of land are farmers retiring from use and putting into the Conservation Reserve? What was it being used for before it went into the Reserve? Is it typical U.S. farmland?

To get at the answers to such questions as these, the U. S. Department of Agriculture's Soil Bank Division has made a study of former use of Conservation Reserve cropland as compared with the use of all U. S. cropland reported in the 1954 Census, latest available

If interested in a natural program of farming it will pay you to investigate and

New Jersey Green Sand and Calphos Any quantity available Bag or Bulk

Ton or carload lots. You are cordially invited to attend the illustrat-ed lecture on "The Agricultural Problem" by Dr. William A. Albrecht, Professor of Soils, University of Missouri, since 1916

April 11, at 7:00 P. M. Manheim Township Jr. High School Auditorium at Neffsville.

Here are the highlights of ture, and idle and fall

1. The land placed in the Conservation Reserve contained a substantially higher percentage of acres devoted to oats, barley, grain, sorghum, and flaxseed than the percentage of all U.S. crop land devoted to those crops.

2. The Conservation Reserve land was about equal to the U.S. average percent age of corn, wheat, soybean vegetable and peanut acreage.

3. The Reserve was substantially below the national of the Conservation Rese average in its percentages of formerly devoted to cropland hay, rotation pas- uses.

For example, while are grown on only about of all U. S. cropland, in than 14 percent of the age that will be under servation Reserve contra in 1960 was formerly in the Sixteen percent of the serve acreage was form in corn—within 1 percent point of the national age.. On the other hand most one third of U S land is in hay and rotate pasture, but only 17 past

If You Raise Broilers...

it's

## THE RIGHT COMBINATION THAT COUNTS!

- CHICK QUALITY
  - MANAGEMENT
    - WEATHER
      - EFFICIENT FEED

AND A LOT OF OTHER FACTORS ARE INVOLVED.

Here are a few of our customers broiler records which came to our attention in the last several weeks.

	Age		
No. Birds	Wks. Days	Weight	Conversion
18,000	9-3	3.72	2.37
11,000	9-5	3.91	2.43
3,500	9-2	3.84	2.23
12,000	9-2	3.99	2.25

GOOD? Of course it's good and it shows what can be accomplished when a grower manages to combine ALL of the

necessary factors which go into producing GOOD birds at a LOW COST.

May we help you do better with EARLY BIRD Service? (finest Poultry Service anywhere.)
