

Food for the American worker is the best buy in the world. Only seven years ago a factory employee had to work 51 hours to feed an average size family for a month. Today, he works less than 40 hours to do the same.

Let our factory-trained representatives show you why dairymen everywhere choose Girton over ordinary farm tanks.

Tomato Breeding Project Taken To Mexico

Russell E. Larson, head of the department of horticulture at the Pennsylvania State University, has been granted a six-month leave-of-absence to conduct tomato breeding studies in Mexico. Dr. Larson will leave the University the latter part of June, taking his family and traveling by automobile. The Penn State horticulturist is prominent for his

work in vegetable breeding research, especially hybrid tomatoes. In 1948, Dr. Larson's studies of F1 tomato seed production techniques won him the Leonard H. Vaughan award of \$500. In 1955, he won the All American Trials bronze medal for the Pennswest muskmelon, developed at the Pennsylvania Agricultural Experiment Station. He also introduced the Keystone F1 hybrid tomato in 1947.

or agricultural engineering Funk said interested applicants should contact the county district directors for endorsement and should apply before July 1st, he added.

At a meeting of the Association's Executive Council in State College Saturday, plans were made for the annual conference of soil conservation district directors to be held in Washington, Pa., on Nov. 3-4. Lee Adamson of Avella has been appointed program chairman for the session. Directors from Allegheny, Westmoreland, Greene and Fayette Counties will assist in making local arrangements.

Judges for the 1960 conservation speech contest for FFA chapters sponsored by the Association were announced at the council meeting. They are Gerald Bullock, of Belleville, first vice-president, Wayne B. Rentschler, Lampeter, program chairman and Dallas Perfect, state administrative officer, U. S. Soil Conservation Service.

At the Council meeting Raymond D. Shaffer of Dalmatia, Association president, reported that numerous contacts have been made with Pennsylvania Congressmen to encourage location of a \$300,000 water and soil research laboratory in Pennsylvania. Further efforts are planned by the research and legislative committees, he said.

FLORIN LA-MOR

HAS A DEFINITE PLACE IN YOUR EGG PRODUCTION PROGRAM

Results: From A Recent 12 Months Test — Eggs Were Produced On Florin La-Mor For

4.1 lbs. Feed Per Dozen Eggs

You can do the same or very similar on your farm with Florin La-Mor and Proper Management.

FLORIN LA-MOR is....

- Complete • Economical • Practical
- Delivered in bulk or neatly packed 50# papers

Allow us the pleasure of serving you—

PICK THE ANSWER to your chopping needs

Auger-Blower model gives you 45% more chopping action with 56 double edged knives. Chop green forage, cut silage, mow, clip, shred and mulch! Full-width auger feeds cutter-blower for positive handling, finer chopping.

Direct-Throw model does your daily green-chop chores, plus many other cutting and shredding jobs... at a saving. Big, cup-shaped knives throw forage to the wagon. Knives are mounted to double-cut, too. Let us quote you our low price.

Shredder model chops stalks, weeds, brush, or tree prunings with a minimum investment. Rugged, direct-drive rotor mounts double-edged knives which can be reversed for twice the life.

MCCORMICK NO. 5 FIELD CHOPPERS

45% MORE CHOPPING ACTION!

New McCormick® No. 5 FIELD CHOPPER

- 56 double-edged knives
- Full width auger
- Four blower knives
- Heavy-duty power train
- Direct rotor drive

Now you can get 45% more chopping action while you chop green forage, cut silage, mow, clip, shred, and mulch! See how the No. 5 Auger-Blower Field Chopper does all these jobs—and more. Exclusive double-chopping action... more rotor speed... cuts finer and faster. See us for the full story on all the features, now!

New McCormick No. 61 Power - Unloading Wagon

- ★ 400 Cubic-Foot Capacity Box
