ing (Saturday, only), use of the oldtime steam locomotive, blacksmithing, gunsmithing, bullet molding, pottery making, wood carving, chair making, wood turning, basket weaving, and oven baking.

Tinsmithing and copper-smithing are on the program along with lace making, rug weaving, cloth weaving, rug hooking, wool and flax spinning, corn mat braiding, and printing. Taking part will be 29 volunteer craftsmen.

Hours each day will be 1 p.m. to 5 p.m. The Museum is on Route 222, four miles northwest of Lancaster. A nominal admission fee will be charged.

County Firm Receives Shipment Of Flykiller

Over 250 billion flies on Pennsylvania farms will be killed by the shipment of almost 10 tons of Banafly syrup recently received by the New Holland Supply Co., of New Holland, according to officials of the company.

Although a mighty number, the figure is considered a conservative estimate based on the small amount of the ingredient required to kill one fly.

The tractor-trailer load of the syrup delivered to the New Holland firm is one of the largest shipments of insecticide to come into the county this year, officials said

soil building and conservation practices.

When questioned about the Bengal Tigers in his native district, Bose explained that there is no closed season on the big cats, but a permit is required in order to kill one.

Other large wild animals in the forests under the jurisdiction of Bose are rhinoceros and elephants. The one-horned Indian rhinoceros was becoming very scarce and none may be killed.

The elephants sometimes become so numerous that they must be controlled. When this happens, stockades are built and the wild elephants are driven into the compound and captured with the aid of trained animals. The excess animals are then trained or sold to zoos. An elephant may not be killed unless it has been declared a rogue by the divisional forest officer and the district forester.

Bose explained that while the well known Teak wood is one of the most profitable trees in India, it is not the most useful timber tree. More structural lumber is cut from the Sal (pronounced "Shal") than from the teak which is used more for furniture and for shipbuilding.

After leaving Lancaster county, on July 3, Bose will study at Nashville Tennessee, Granada, Mississippi; Athens and Atlanta, Georgia and at the SCS training center at Coshocton, Ohio, returning to India on November 18.

Married about a year and a half, Bose is traveling in this country alone. "After all," he asks, "How far can two travel on 70 rupees?"

Wheat Quota Cards To Be Available

Farmers will receive notice of their 1961 farm wheat allotments well in advance of the July 21 marketing quota referendum, Earl Groff, Chairman of the Pennsylvania Agricultural Stabilization and Conservation Committee, has announced. The overall wheat allotment for Pennsylvania for 1961 is 555,818 acres, about 2 per cent less than the 1960 allotment.

The 1961 national wheat acreage allotment is 55 million acres—the minimum that had been determined solely on the basis of the law's supply formula, the 1961 allotment would have been zero acres. The allotments apply in 39 States designated as "commercial."

As directed by law, marketing quotas must be claimed for the next wheat crop when the available supply is more than 20 per cent above the normal supply. The supply for 1960 is estimated at 2.5 billion bushels—92 per cent more than normal.

No other combines made can set such an acreating pace. That's why they're called—

HORIZON SHRINKERS

Any way you measure it, big capacity means—getting through the harvest fast! That's why Massey-Harris combines are so famous the world over . . . And the champ of them all is the big MH 92. Because of its speed and day-after-day dependability, it's the first choice of more farmers than any other.

Exclusive Massey-Harris Balanced Separation and full-width, straight-through body design gets more grain in the tank, faster and cleaner, too. The distinctive Massey-Harris low silhouette provides a lower, safer center of gravity for easier handling, transporting and storing.

Why don't you come in and learn all the reasons why you need a Massey-Harris combine for highest profit harvesting.

HARSH HYDRAULIC HOISTS

The 32 available models come to you with a wide range of lifting capacities ranging from 3 1/2 to 20 tons for your truck, pickup, or trailer. The smooth, trouble-free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling.

These hoists come to you at an average cost of only 16¢ a day as compared to the \$10-\$15 a day you now spend to manually unload your truck.

To design and build a light weight, low cost truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HARSH HYDRAULICS UNLIMITED MFG CO began operations. This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only \$328.52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs. These economical hoists are built for either back or side dumping, depending upon your need.

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.
