**WATER SOFTENERS**

Package water softeners  
are of two types, explains  
Helen Bell, Penn State home  
management extension spe-  
cialist. In one the chemicals  
combine with water hardness  
minerals to form a precipi-  
tate that resembles small  
curds. The water appears  
cloudy. In the other nonpre-  
cipitating type the minerals  
are kept in solution so they  
cannot combine with soap.  
The water remains clear. Al-  
ways read the label on the  
container for instructions on  
use of a softener.
