Contests this year because of his preparation for election, but his brother, Paul, carried on the tradition by winning one of the gold medals in the Dairy Cattle judging contest.

If the dark surface on the top of a hard-cooked egg in the shell plagues you, here is a tip: Cool cooked eggs promptly in cold water. This also makes the shells easier to remove when preparing eggs for salads or deviling.

SPABC Guernsey Sire Is Rated

PETERBOROUGH, N. H.—Sterlingold Lauxmont King, registered Guernsey bull, owned by Southeastern Pennsylvania Artificial Breeding Cooperative, Lancaster, Pennsylvania, has become a Summarized Sire, according to the American Guernsey Cattle Club. To attain this distinction, a bull must have at least 10 daughters with official production records.

"King", has 10 tested daughters that have made 13 official production records. Their average production is 9,220 pounds of milk and 459 pounds of fat, when converted to a twice-daily milking, 305 day, mature equivalent basis.

This fine Guernsey bull was bred by Sterling Farms Inc., Stamford, Connecticut. This bull's sire was Gardenville Rose King and it's dam was Sterlinggold Mandv, that posted an official production record of 17,910 pounds of milk and 848 pounds of fat.

"King's" most illustrious daughter is Lauxmont King's Countessan, that had a production record of 8,726 pounds of milk and 521 pounds of fat in the 365 - 3X division.

FEED FOR LAYERS

A 4-pound bird laying at the rate of 15 dozen eggs a year will require 53 pounds of feed to produce a dozen eggs, according to Carl Dossin, Penn State extension poultry specialist. The same sized bird laying 18 dozen, or 60 per cent production, will produce a dozen eggs on about 48 pounds of feed.
