● **Egg Marketing**
(From page 1)

Markets, points out under Pennsylvania law, regulations must apply uniformly to all affected persons. "This change does not prevent the voluntary use of a date code or date imprint to assist in quality control of cartoned eggs," Rainey said.

Presently only the term "not classified" is acceptable on cartons of eggs not segregated according to official Pennsylvania grades. Under the proposed change, the term "unclassified" or other terminology acceptable to the Department of Agriculture may also be used.

Consumer grade weight tolerances would be applied to multi-dozen packages in the same manner as they apply to one dozen cartons under the provisions of another change.

Individuals and organizations may file objections or corrections with the Bureau of Markets through July 1. New Standards will be announced as soon thereafter as possible. Present standards will remain in effect until 90 days after the new standards are published.
