MH

SPROUT CONTROL

**TREATED POTATOES
 GROW BIG—
 But Don't Sprout**

Many growers who use MH sprout control report storage sprouting is eliminated. In fact, one large Michigan potato grower says he doesn't have to hand-sprout at all. MH is so effective that it insures top market price for potatoes even after many months of storage. It's safe, non-toxic, does not affect flavor, color, quality or yield. Inexpensive and easy to apply. MH-30 is applied by ground or air to the potato foliage before harvest. Write, wire or phone us if unable to locate immediate source of supply.
