EXCLUSIVE SPEEDY RAFTERS MAKE **SPEEDY** CORN CRIBS

# Twice as Fast

twice as easy to erect

Speedy roof rafters guarantee easy, proper placement of roof panels the first time. Rafters add great strength to the roof. Panels need only to be bolted together in three places. It's another big time-saving feature you get only in Speedy Bar-Lok corn cribs.

Stands up best—lasts longer  
Wire mesh panels are 5-gauge wire—thick

as a 1/4" bolt! No bulge or sag. Sturdy 26-gauge galvanized roof is securely anchored to 9 steel roof rafters and side panels. Can't blow off!

Come in today and see the Speedy Bar-Lok corn crib. Let us prove to you that Speedy is twice as fast—twice as easy to erect. Let us show you all the other features that make Speedy Bar-Lok your best corn crib buy.

## COWS PROPERLY CONDITIONED

... during the dry period **PRODUCE**  
**UP TO 25% MORE MILK!**

**BEFORE CALVING** This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

**AFTER COMPLETING RECORD** The same cow after having produced 23,044 lbs. of milk and 941 lbs of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11½ tons of milk!

**600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!**

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and *most importantly they will produce up to 25% more milk!*

See us today for full particulars.
