**LEARN-BY-MAIL POPULAR**

A total of 7,212 correspondence courses in agricultural and home economics subjects were distributed to new and old students by Penn State during the year ending June 30, 1960, reports Fred C. Snyder, director of correspondence courses. Courses were evaluated by "study points" which correspond to number of lessons. Students completing courses worth 60 or more study points were awarded certificates which carry the signature of the dean of the College of Agriculture at the University.

**ALL "Certified" SEED IS NOT ALIKE**

DON'T LET ANYBODY tell you all Certified seed the same. There IS a difference! A. H. Hoffman Seed Inc. is not only the largest producer of "Certified" winter grains in Pennsylvania, but the superior quality Hoffman "Certified" seeds exceed the state certification standards by a wide margin.

FOR EXAMPLE:

Penna. Certification Requirements for Barley	A. H. Hoffman's Certified WONG BARLEY (4 year average)
99.00% (minimum)	PURITY — 99.76%
1.00% (maximum)	INERT MATTER — 0.23%
90.00% (minimum)	GERMINATION — 95.00%
46 lbs. (minimum)	WT. PER BU. — 50.6 lb.

The blue certification tag is not enough. The Hoffman brand tag on the seed you sow can mean bigger profits for you. That fact has been demonstrated for 60 years.

For complete information and prices on Hoffman WONG BARLEY, DuBois Winter OATS, Pennoll, Dual and Seneca WHEAT, Balboa and Tetra-Petkus RYE, as well as other fall seeds,

contact your Hoffman salesman today or phone TW 8-3421 for delivery right to your farm.

**NEW! GEHL 72 CHOPPER**

**6-foot chopper at a 5-foot price**

A full 6-footer for the forage harvest and green chopping plus all a shredder can do. Big, big capacity — PTO-powered with 72 inches of rotating flails and a knife-edged fan to double-cut the crop and keep 6 feet of swath sailing into the wagon. Loads it trigger quick way back to the wagon corners. No fan threshing or crushing! Cuts and chops at the flails... chops finer at the fan. Up to 1/3 more capacity than most flail choppers. It's Gehl built... durable, and is actually priced below most 5-foot machines.

GEHL PUTS ALL THE PRICE FACTORS IN YOUR FAVOR

**COWS PROPERLY CONDITIONED . . . during the dry period PRODUCE UP TO 25% MORE MILK!**

**BEFORE CALVING** This cow was fitted on the Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

**AFTER COMPLETING RECORD** The same cow after having produced 23,044 lbs of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairyness and exceptional body condition shown after this cow produced 11 1/2 tons of milk!

**600 pounds of PIONEER DRY and FRESHENING yields an extra TON OF MILK!**

Proper feeding of the dry cow is the most important single factor affecting herd health, longevity, and a sustained high level of milk production. In 60 days, while the cow is dry, Pioneer Dry and Freshening feed will repair the body from the previous lactation, build a reserve of body condition for the next lactation, and develop a stronger calf. In addition your cows will have less calving difficulties, eliminate placenta quickly, have less udder congestion, and most importantly they will produce up to 25% more milk!

See us today for full particulars.
