They had a production average of 10,759 pounds of milk and 524 pounds of butterfat. Melvin Stotz, Ronks R1 and Howard Wagner, Quarryville R2, were presented awards in recognition of their scores in the milk division at the 1960 Pennsylvania Farm Show.

Lloyd Eiler, Camp Hill, field man for the state Guernsey Association announced that the national registry association has removed all penalty fees except \$1.00 for over age animals. Eiler urged that breeders owning an unregistered animal have the animal registered before Mar. 1, 1961. The ruling will be in force until that time.

Toastmaster and program director for the meeting was Paul Ankrum, Peach Bottom president of the county Guernsey Breeders.

**Dairy Association To Hold Meeting**

Dairy Farmers shipping to any milk receiver in Lancaster County are being invited to an educational meeting by the American Dairy Association.

The association, claiming over a million members in the United States stresses research in nutrition and marketing as well as merch-

andising and advertising.

Farmers will have an opportunity to see and hear the program of the national group and ask questions concerning policy and activities.

The meeting will be held November 29 at 8 00 p m. in the Landisville Elementary School.

Most of the world's people spend half if their income for food in the U S only 21 percent of the income is for food

**Flory's Feeds**  
for Profit—

Whether you are feeding poultry or other farm animals, there is one thing you can always depend on. FLORY FEEDS are nutritionally sound in every respect. They are manufactured under the most rigid standards to safeguard its exact formulation throughout every step of manufacture. All feeds are subjected to routine laboratory analyses to determine protein, fat, fiber, vitamins, medications, antibiotics, etc., levels.

Each bag of FLORY'S FEEDS contain a tag which is your guarantee of "top-quality" performance. That's why FLORY'S FEEDS produce outstanding results.

**VENT-O-MATIC**

Is "Most Efficient"

There's a BIG DIFFERENCE in ventilating equipment

Studies at CORNELL show that one 36-inch "Vent-O-Matic", delivering 10,000 cu. ft. of air per minute (air for 2500 average birds) costs \$47.30 per year for power, compared with \$78.15 for the next most efficient system. Others cost from \$147.58 up to \$260.16 for power on the same size job.

**COULD YOU USE 8½ CENTS PER BIRD EXTRA A YEAR?**

Total operating costs (including depreciation) put Vent-O-Matic ahead by a wide margin. Prof. C. N. Turner of Cornell says: "In a large house (8500 birds) the difference in operating cost could be as much as \$700 a year . . . The efficiency of the motor and fan assembly can be more important than the purchase price."

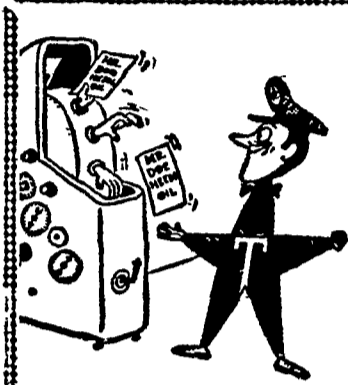

Before you buy, get an air-delivery rating . . . and you'll buy "Vent-O-Matic". You'll like its smooth, care-free performance. Birds like the uniform temperature and humidity (Cornell data) in hot and cold weather, without drafts or pockets.

"Vent-O-Matic" is a complete ventilating system . . . not just a fan. You get full automatic control, continuous air movement, and close temperature regulation as well as low first cost and the most economical operation.
