

**Lepto**

(From page 1)

annual losses of an estimated \$150,000,000 to livestock herds in the United States. It affects not only cattle and swine, but also horses, goats, sheep, and rats and, occasionally, man. The greatest economic loss to owners of swine and catfish herds is due to abortion, a veterinary group pointed

out. Lepto also causes mastitis in cattle, resulting in a drop or complete stoppage of milk production. In swine the disease also can affect young pigs, causing kidney damage and stunting.

Livestock may get the disease "by drinking infected water, breathing infected air coming in direct contact with carriers or by eating contaminated feed.

**Holstein Bull Added To Stud At Southeastern**

The Southeastern Pennsylvania Artificial Breeding Cooperative's latest addition to the bull stud is the Holstein sire, Cochran General 12154-02. He was purchased from General Cochran Farm at Fort Plain, New York. Cochran General will be known to members as SH59 General, and is available to Holstein breeders throughout the area served by S. P. A. B. C.

Classified "Excellent" at 91 points, SH59 General gives the stud its second sire with the highest classification awarded by the Holstein

Latest addition to the Southeastern Pennsylvania Artificial Breeding Cooperative Holstein stud is Cochran General, classified "Excellent" at 91 points. Shown here with Cochran General's Earl Groff, R. D. 1, Strasburg, Pa., chairman of the S.P.A.B.C. Holstein Purchasing Committee.

Friesian Association. In 21 tested daughters with 33 records average 13,164 lbs. of milk, 4.00 per cent test, and 526 pounds of fat.

Cochran General is a son of SH42 Sovereign Commander Antonio (classified "Very Good"), and his dam is the "Excellent" Cochran Sovereign Gail. His 29 classified daughters average 84.1, with 15 "Very Good," 12 "Good Plus," and two "Good." His

Bruk VII Pansy Beauty Lucifer 3605023 owned by Isaac M. Brubaker, of Lititz, produced 13,790 lbs of milk and 498 lbs butterfat in 305 days on twice daily milking as a 6-year-old

Here's BIG News from your **NEW HOLLAND DEALER**

**YOU GET A FINER PATTERN, FASTER . . .**

with a New Holland tractor-driven Model 331 Manure Spreader.

Big 130-bu. ASAE-rated capacity means lower total costs—bigger loads, fewer trips, and less time and fuel.

Exclusive CYCLON-ACTION gives you high speed shredding and fine, uniform spreading. Heat-treated paddles for extra toughness . . . specially treated wood flooring . . . primed steel sides . . . New Holland gives you the best combination of steel and wood for maximum strength and longer life.

Convenient rope control puts you in charge of the operation from your tractor seat—with a choice of 4 apron speeds!

ASK US ABOUT ALL THE ADVANTAGES OF A MODEL 331 SPREADER.

**New McCormick No. 35**

introduces all McCormick features to the 125-bushel spreader field!

Another sparkling new addition to the advanced McCormick spreader line for day-to-day hauling from herds to 40 head! The new No. 35 marks an outstanding adaptation of McCormick design to the 125-bushel spreader field. Handy, light-running, easy to load and maneuver, the new No. 35 gives top performance, even in poor field conditions. Delivers the same, low, controlled spreading pattern that characterizes all McCormick spreaders. Disc-type friction clutch protects drives against overloads. Four spreading rates for each tractor speed let you match application to your soil needs.

**McCormick No. 40**

145-bushel capacity with bonus strength for big livestock operators.

The brawny No. 40 shrugs off the shocks of heavy forkloads fed by power loaders . . . and the strains of carrying 145-bushel loads across rough fields. With its rugged, channel frame and steel-clad box, the McCormick No. 40 is today's big-pay spreader in the field and can handle the daily requirements of 50-head herds. One adjustable length lever starts and stops apron feed . . . gives four spreading rates for each tractor speed. Another control on the lever lets spreader apron operate with beats stopped, prevents throwback when finishing a load, and thoroughly cleans all material from the box. Heavy-duty power train with heat-treated gears includes 20 ball and roller bearings for smooth, even transmission.
