FORD
SELECT-O-SPEED

Hydraulic power does the actual shifting, but it's controlled by this handy lever under the steering wheel. A light touch is all you need to shift to any gear—10 speeds forward, 2 reverse—at any time.

Now — finger-tip, clutchless shifting with hydraulic power doing all the work! For the first time, you can shift on-the-go to any speed you want, any power you need, by a simple touch of your finger. Now you can match pull-power and speed exactly, instantly, to changing field conditions. And what's more, independent PTO engages or disengages on-the-go, too, to save time and speed PTO work. With clutchless power shifting and independent PTO, you'll do more work and cover more acres. Come in and test drive a Ford Select-O-Speed tractor soon—see what it can do for you!

600 pounds of PIONEER
"DRY AND FRESHENING" yields
an EXTRA TON of milk!

BEFORE CALVING
 This cow was fitted on Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

AFTER COMPLETING RECORD
 The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairy-ness and exceptional body condition shown after this cow produced 11 1/2 tons of milk.

60 DAYS ON PIONEER DRY AND FRESHENING WILL IMPROVE PROFITABILITY OF YOUR HERD

PIONEER DRY AND FRESHENING DELIVERS

- Up to 25% more milk
- Higher breeding efficiency
- Strong, vigorous calves
- Ease in calving
- Quick elimination of placenta
- Less udder congestion
- Better herd health

Calving stimulates a cow to produce fat beyond her ability to convert feed into milk. So, during the first months of her lactation, she "steals" milk-making nutrients from her body.
 It requires only 600 pounds of Pioneer Dry and Freshening feed to repair the body tissue used during the previous lactation... to build a reserve of body condition for the next lactation... and to produce a vigorous calf.
 Pioneer Dry and Fresh, fed during the dry period, is a sound investment in herd health, sustained high production, and longevity for your producing herd.
