

in warm water. Then quickly immerse the mold just to the top in lukewarm water—hot water will melt the mold. Shake mold to loosen gelatin. Place serving dish over top of mold, invert, and lift mold off carefully.

For large molds moisten the surface of the gelatin and the serving plate and unmold as directed above. When the two surfaces are wet, it's easy to center the mold. Remove excess moisture with a towel.

Surround large molds with salad greens after unmold-

ing; they may break if unmolded on crisp greens. Individual molds may be turned out directly on greens.

SALAD GREENS

Put flavor, color, and texture interest into salads by using a variety of salad greens such as some of the following. leaf lettuce, head lettuce, escarole, Chinese cabbage, watercress, romaine, chickory or curly endive, Boston lettuce, bibb lettuce and French endive. Tender young spinach leaves, celery tops, and mustard greens may be added to tossed sal-

ads. Fresh crisp greens are essential to salad making success, so select the best quality available, and clean and refrigerate them as soon as possible after purchase.

First, remove any wilted parts from salad greens, then wash well in lukewarm water. No, it won't wilt them and is best for thorough cleaning.

After washing, drain in a wire rack, on paper towels, or pat dry with a soft towel. Greens must be thoroughly dry for attractive salads.

To separate a head of lettuce into cups, cut out core with point of knife; hold opening under cold running water until leaves are forced apart.

Once greens are cleaned, store in the refrigerator in a vegetable crisper or plastic bag to chill and crisp.

Wash parsley, watercress, or mint as directed above, but store in a tightly covered container (A jar is convenient.)

SALAD DRESSINGS AND TOPPINGS

Add sparkle to salads with extra-good salad dressings, toppings, and garnishes. The following suggestions give you many a "quick change trick" for every day favorites.

Try for contrast in texture, flavor, and color when choosing salad dressings, toppings, and garnishes.

Serve salad dressing with the salad or pass it at the table.

For fruit salads, thin mayonnaise to any desired consistency with canned fruit syrup.

Soften cream cheese with

canned fruit syrup and use as a fruit salad topping. (Blend about 2 tablespoons syrup with 1 3-oz. package cream cheese.)

Sprinkle fruit salads with one of the following: coconut (plain or toasted), walnuts or pecans, slivered almonds, chopped candied ginger, or maraschino cherries.

Mix blue cheese or Roquefort with mayonnaise for a nippy topping.

For vegetable salads add deviled ham, sweet relish, chopped sweet or dill pickles, chopped stewed green or Turn to page 8)
