Dabroski arrived in the United States last April and traveled immediately to California where he worked for seven months with the California Packing Corp. During his stay there he worked with irrigation crews. "All the time, Sunday too" is the way he puts it.

After leaving California he traveled east touring spots of historic and scenic interest along the route.

His stay with the Kreider family will last about six weeks after which he will leave (about February 10th) for Huntington, Indiana.

In Indiana, Dabrowski will continue his study of drainage systems and their uses. When he returns to Poland

he will continue work as a Soil and water conservation planner in the Bureau of Reclamation.

In commenting on the farms in Poland, he said, "Farms are much smaller. The average farm is about 25 acres with two to three cows, one or two horses, 20 to 40 chickens and 10 to 20 pigs."

He said only about 15 per cent of the land is in collectivized farms while the other 85 per cent is still in the family farm.

Less than 10 per cent of the people in Poland belong to the Communist party, he said. "There was the revolution in 1956, and that was a very bad time for the Polish people," he said, "But things are pretty good now."

During the time Dabrowski is in the United States his wife and two children draw a subsistence from the Polish Department of Agriculture.

"Cooperation between the communists and the Brethren Church" Dabrowski said with a chuckle and a twinkle in his eye.

When asked about his daughters, Dabrowski said the older one is four years old. "The younger one was born in December, I have not seen her."

Dabrowski, who was reared on a small farm in Poland plans to return to Warsaw in April.

DRAINAGE TILE, almost a mile of it is under the ground here, James Kreider, pointing, tells George Dabrowski, a visitor from Poland. Dabrowski, in the U. S. to learn irrigation and drainage, was told that this pasture was formerly swampy and of very little use. Now, with the drainage the entire pasture can be worked with tractor equipment. —L. F. Stretch Your Grain
with Sugared Schumacher Feed

It's an
ALL-PURPOSE
Livestock Feed
for
DAIRY & BEEF CATTLE
HOGS, SHEEP & HORSES

YOU'LL LIKE YOUR FEEDING RESULTS when you feed Quaker Sugared Schumacher Feed to your livestock—either as the entire grain ration or in combination with other grains. You see, it's a blend of grain products plus molasses, added proteins and minerals—including important trace minerals. It's nutritious, palatable and digestible. And it's priced right . . . for economical feeding.

Contains:
✓ GRAIN PRODUCTS from corn, oats, wheat, barley
✓ MOLASSES
✓ ADDED MINERALS . . . Including trace minerals
✓ ADDED PROTEIN
