**Nutrition Studies
USDA Needs Twin Bull Calves**

Several pairs of identical-twin beef-type bull calves are needed by U. S. Department of Agriculture scientists for use in nutrition and breeding studies to be conducted at USDA's Agricultural Research Center, Beltsville, Md.

The bull calves sought for purchase can be either purebred, grade, or crossbred animals less than 5 months old.

The calves are being sought, so far as possible, within a 250-mile radius of Washington, D.C., as a means of holding shipping costs to a minimum. This includes Maryland, Virginia, West Virginia, and southeastern Pennsylvania.

Owners or producers willing to sell identical-twin bull calves that meet USDA specifications are requested to write Dr. Everett J. Warwick Chief, Beef Cattle Research Branch, Animal Husbandry Research Division, Beltsville, Md. An inspector will be sent to check the calves before purchase.

Identical-twin calves are rare, and are developed from a single cell. They are always the same sex, look very much alike, and react in much the same manner. Frequently their markings may be repeated on the same or opposite sides. In cases, where the right and left side markings are reversed, the resemblance is known as "mirror likeness".

Identical-twin calves are particularly useful in research. (Turn to page 11)

**DO YOUR BROOD SOWS
NEED HELP?**

Most sows do not give enough milk beyond the 5th week of lactation to meet the requirements of large litters.

TRY OUR—

**No. 12 Green Pastures
Pig Starter Pellets!**

HOW TO USE:—

Start Creep feeding No. 12 when pigs weigh 5 lb. or are 7 days old and feed through 6th week when pigs should weigh about 25 lbs.

AMOUNT REQUIRED

15 to 20 lbs. per pig.

FEED PER LBS. OF GAIN DURING THIS PERIOD

1.25 to 1.50 lbs.

FIELD TESTS INDICATE:—

1. More uniformity in pigs, fewer runts.
2. More economical gains. Heavier pigs at 8 weeks.
3. Pigs may be weaned at six weeks. This gives more time for proper conditioning of sow before re-breeding.
4. Easier to maintain farrowing schedule.

MOST PALATABLE FEED WE HAVE
"Sweet as a good muffin"

If we can help you design a profitable program for your swine enterprise or aid you in problems relating to swine management or nutrition see your Miller & Bushong Service Representative or call us direct at Lancaster EX 2-2145.

"Finest Service Anywhere"

The FIRST FEED
for Baby Chicks!

A Proven Starter-Grower Program

The 1st 7 Weeks
Feed RED COMB CHICK STARTER... for strong yellow shanks, rapid feathering and quick growth at low feed cost!

After 7 Weeks
Change to RED COMB GROWER.

- Gets chicks on feed quickly!
- Prevents "pasting" when fed first few hours!

ALSO

it's a "pepper-upper" for growing birds and layers.

plus RED COMB SCRATCH or your own grains "Free Choice"

This combination produces sturdy frames and healthy bodies for top egg producers, and quality fryers.

**Plow an hour on
1 gallon of fuel!**

**FORDSON
DEXTA DIESEL TRACTOR**

Cut those high fuel bills—by as much as 50 percent—with a Fordson Dexta Diesel. The Dexta's highly efficient diesel engine keeps fuel consumption down as low as 1 gallon an hour while you're plowing! You'll add versatility, too, with a handy 2-3 plow Dexta... its 3-point linkage fits most Ford "Pick-up and go" implements... and 6-speed constant mesh transmission gives the right speed for every job. And here's the best part—Dexta is in the same price range as comparable gasoline tractors of other makes! Come in today for all the details.
