Ph. TW 8-7444

SHOWN ABOVE ARE THE EIGHT RECIPIENTS of the chain gilts this year. Left to right they are: Leon Weaver, Kenneth Martin, John Campbell, Gerald Allison, Eugene Zimmerman, Robert Mohler, Walter Musser, and David Weaver. Last year, chain swine were presented to eight members of the Grassland FFA Chapter of the Garden Spot High School by four area organizations to encourage the production of registered swine in the New Holland Area. According to the contract, each boy receiving a gilt agreed to raise it with good management, produce a registered litter at the proper age, and return one gilt from its first litter to the FFA so that the chain will continue. All the chain pigs have now farrowed and one pig from each litter has been given back to the FFA to be awarded to eight other boys this year. The four organizations who made this chain swine possible were Groff's John Deere Agency of New Holland, Constoga Landrace Farm, Earl Sauder's Feed Mill, and the Sears, Roebuck Foundation.

**K-137 Kimber CHIKS...**

**10¢ to 34¢ MORE NET INCOME  
THAN OTHER MAJOR EGG STRAINS\***  
(35¢ more than average entry in 15 tests)

\*Based on final reports in 1959-60 Random Sample Tests in Ariz., B.C., Calif., Fla., Ia., Minn., Mo., C.N.Y., W.N.Y., N.C., Pa., Tenn., Tex., Utah, and Wisc.

In the three 1959-60 tests in which the new K-155 Kimberchik was entered, it equalled the well-known K-137 in net income.

**HARSH HYDRAULIC HOISTS**

The 32 available models come to you with a wide range of lifting capacities ranging from 3½ to 20 tons for your truck, pickup, or tractor. The smooth, trouble-free action of a HARSH HOIST has a fast lifting time of from 12 to 160 seconds, which allows more time for actual hauling.

These hoists come to you at an average cost of only 16¢ a day as compared to the \$10-\$15 a day you now spend to manually unload your truck.

To design and build a light weight low-costing truck hoist suitable for all types of farm use, priced within the average farmer's budget was the aim of "Bud" Harsh when HYDRAULICS LIMITED MFG CO. began operations. This hoist was built and is now in use throughout the nation.

The HARSH HYDRAULIC HOIST averages only \$328.52 (including Federal excise tax) and maintains a low taxable weight which averages 273 lbs. These economical hoists are built for either back or side dumping, depending upon your need.

Save costly time and eliminate back-breaking labor by unloading with a HARSH HYDRAULIC HOIST engineered for economical, speedy, and durable farm use.

**Farmers Plan Less Tobacco,  
About The Same Feed Grains**

HARRISBURG, March 20—719,000 to 690,000 acres Bar-Pennsylvania farmers plan to plant more acres to corn, re-ley acreage, most of which is planted in the fall, re- hold the line on barley ac- mains unchanged at 171,000 acreage and plant less oats. The acreage of food grains —wheat and rye—is down 3 per cent Winter wheat acreage is down 3 per cent to 530,000 acres and rye down 9 per cent to 30,000 acres. The record snow cover- during December and January protected the fall- sowed crops from freeze damage and wheat, barley rye and fall-planted hay fields are all in excellent condition.

These intentions for the 1961 crop year were disclosed today by the Crop Reporting Service of the Pennsylvania Department of Agriculture following a state- wide survey of farmers. The report also disclosed that fewer acres are planted to wheat and rye this year than last.

The nine principal crops of Pennsylvania will occupy a total of 4,997,000 acres for 1961 compared with 5,034,000 acres of the same crops planted for harvest last year. Compared with the 10-year average, all crops except tobacco show an acreage decline with the aggregate total down 8 per cent.

Total feed grain acreage will be 1 per cent less than last year. Corn farmers intend to plant 1,299,000 acres, about 1 per cent more than in 1960. This increase is offset by the 4 per cent decline on oats acreage from

Potato growers intend to plant 46,000 acres, the lowest on record. Cigar tobacco acreage is expected to be about 1,000 acres below last year at 30,000. Intended soybean acreage is expected to be 10 per cent lower than last year at 30,000 acres.

Actual acreages planted may vary from these intentions due to weather, price, new agricultural programs, or the effect of this report itself upon farmers' actions.

Live pedestrians and successful men always think fast on their feet.
