MEYER Hay Conditioner Model No. 675

Leaves Stay on Stems when SLOW ROLLED

MEYER Conditioning Rolls revolve slower . . . because they are fed by an exclusive, separate pick-up — and do NOT rely on high speed in order to pick up the hay. When high speed rolls are used, hay is grabbed up and forced through . . . leaves are lost. With the MEYER, the hay is lifted and fed through the slower-moving rolls which thoroughly but gently crack the entire stems without crimping and gently press the leaves. The leaves a MEYER saves put more dollars into your pocket, yet MEYER is priced lower.

Condition while you cut. Use your own mower with Model 675, or get Model 680 with built-in-mower, a MEYER patented feature. Model 205, without separate pick-up, is for use on smooth, rock- and terrace-free fields. Does superior job to crimper-type machine.

MEYER — maker of famous MEYER elevators — is the original and oldest manufacturer of hay conditioners — with over five years more experience than all other makes.
