

**AUTOMATIC DELIVERIES!**

Based on the severity of the weather and your "degree-day" needs. No need to call us — and no worry about running short.

**GARBER OIL CO.**

105 Fairview St.  
MOUNT JOY, PA.  
Ph. OL 3-2021

LEARNING SOME OF THE FINER POINTS of grading a beef carcass are the members of the 4-H Town and Country club. Carl Dalton, plant superintendent of Kunzler and Company, Inc., right, points out some of the characteristics considered in grading meat to Alta Groff, left, Florence Mae Flory and Steve Martin. The tour of the local packing plant was to study inspection and grading and the part it plays in marketing agricultural products. —L.F. Photo

**New Booklet On Nat'l. Forests Available**

A new booklet designed to give American families a better understanding of how the National Forests are managed was issued today by the U. S. Department of Agriculture.

"Multiple Use—The National Forests and Your Family" was written especially for use of women's groups. It describes sustained-yield multiple-use of the National Forests in non-technical, down-to-earth language.

many uses of the living room in your home," the booklet states. It then goes on to point out that just as the family room of the home is used in different ways to benefit members of the family, so are the many and varied resources of the National Forests simultaneously beneficial to the public.

"Multiple Use—The National Forests and Your Family" is a pocketbook-sized, 23-page book, with photographs or drawings on every page. Attractively printed in forest green, it is ideal material for club lectures, conservation seminars, and family discussions.

A free copy may be obtained from the Forest Service, U. S. Department of Agriculture.

**600 pounds of PIONEER "DRY AND FRESHENING" yields an EXTRA TON of milk!**

**BEFORE CALVING**  
This cow was fitted on Pioneer program for 60 days before calving. Note the excellent "dry cow" body condition.

**AFTER COMPLETING RECORD**  
The same cow after having produced 23,044 lbs. of milk and 941 lbs. of fat as a 4 year old. Note the extreme dairy-ness and exceptional body condition shown after this cow produced 11 1/2 tons of milk.

**60 DAYS ON PIONEER DRY AND FRESHENING WILL IMPROVE PROFITABILITY OF YOUR HERD**

**PIONEER DRY AND FRESHENING DELIVERS**

- Up to 25% more milk
- Higher breeding efficiency
- Strong, vigorous calves
- Ease in calving
- Quick elimination of placenta
- Less udder congestion
- Better herd health

Calving stimulates a cow to produce far beyond her ability to convert feed into milk. So, during the first months of her lactation, she "steals" milk-making nutrients from her body.

It requires only 600 pounds of Pioneer Dry and Freshening feed to repair the body tissue used during the previous lactation... to build a reserve of body condition for the next lactation... and to produce a vigorous calf.

Pioneer Dry and Fresh, fed during the dry period, is a sound investment in herd health, sustained high production, and longevity for your producing herd.
