

## Best Food Buys Meat Specials Are Featured

Food shoppers continue to lead markets competing for the consumer's dollar. This is particularly evident in food ads this week on "meat specials" and seasonal sales of canned goods. Extension Marketing Alert consumers can profit from this situation by studying food ads before shopping.

The approaching canning season will write the story of next season's canned food prices, but at present most canned foods are holding steady prices. The seasonal clearance is expected to reach a five-year low in supplies. Beets are one exception to the short supply situation. Bargains may also be found in canned tomatoes, tomato juice, peaches, fruit

cocktail and tuna fish. Promotional pricing of meats continues this week and shoppers will find a variety of featured items. This variety will include chuck roasts, steaks and ground beef; pork roasts and chops; and many popular items including frozen turkeys, stewing hens and fryers. Eggs remain on the list of good buys with Grade A large sizes offering most food value for the money.

If you like the flavor of garden-fresh asparagus, wait no longer. Local production of this short-seasoned vegetable is at its peak and supplies for home freezing should be procured now. To obtain good quality, you buy fresh, tender green stalks with close, compact tips. Other good vegetable buys

include pascal celery, sweet corn, green onions, radishes, parsley, spinach, green peas, green beans and both old and new crop potatoes. Tomatoes are in liberal supply and prices are probably as low as they have been in the past several months. Cucumbers and peppers are reasonably priced.

Grapefruit is still the leading value in fruits and the smaller sizes provide the best quality. The Florida Valencia orange harvest is winding up and may show some greening on the fully ripe fruit. This item is a better buy than the new crop Valencias just starting from California.

Strawberry prices move lower as harvesting gets underway in the Maryland-Virginia areas. Heavy rains pose a constant threat to quality. Demand for bananas has been pretty good causing prices to move slightly higher. Higher prices will

also be noted on watermelons as the result of a strong early-season demand. May is the month of peak supplies for pineapple. Supplies of fresh apples have been almost liquidated and very high prices can be expected; a heavy bloom in growing areas gives some promise of a good crop for next year.

### ● Ag Teacher (From page 1)

school young farmer program.

Teachers of vocational agriculture spend the summer meeting with students on their farms for the purpose of supervising the boys' farming programs. Daugherty will make preliminary plans for a Young Farmer program before the fall school term begins.

Daugherty, who is married, plans to move to the New Holland area as soon as suitable housing can be located.

### TAKE OFF OLD WAX

To remove old wax from furniture, rub in a cleaning-polishing or cream wax, suggest Penn State extension home management specialists. This should take off most of the old wax unless a heavy coat has built up. Rubbing with a turpentine dampened cloth will help to take off a heavy wax coating. Rub off any excess turpentine, apply new wax lightly, and polish with a soft cloth.

## Pa. 820 Corn

A high population variety

Yields up to 160 bu. per acre have been recorded.

1. Stands up when others lodge
2. Withstands drought
3. Has a very strong stalk
4. Good resistance to corn leaf aphid and corn borer
5. Responds to thick planting and high fertilization
6. Low uniform height ears
7. Drier at harvest time than other varieties.
