ISOTOX Transplanter Solution
(contains Lindane)

- use against wireworms and other soil insects.
- saves re-setting
- increases crop yields
- allows roots to develop and plants to become established
- mixes readily with water
- a true Colloidal Suspension, not an oil base emulsion.

ORTHO-GRO STARTER SOLUTION can be Combined with ISOTOX TRANSPLANTER SOLUTION to give plants that extra "push" they need to start.

600 pounds of PIONEER "DRY AND FRESHENING" yields an EXTRA TON of milk!

60 DAYS ON PIONEER DRY AND FRESHENING WILL IMPROVE PROFITABILITY OF YOUR HERD

PIONEER DRY AND FRESHENING DELIVERS

- Up to 25% more milk
- Higher breeding efficiency
- Strong, vigorous calves
- Ease in calving
- Quick elimination of placenta
- Less udder congestion
- Better herd health

Calving stimulates a cow to produce far beyond her ability to convert feed into milk. So, during the first months of her lactation, she "steals" milk-making nutrients from her body.

It requires only 600 pounds of Pioneer Dry and Freshening feed to repair the body tissue used during the previous lactation... to build a reserve of body condition for the next lactation... and to produce a vigorous calf.

Pioneer Dry and Fresh, fed during the dry period, is a sound investment in herd health, sustained high production, and longevity for your producing herd.
