

## House Fathers Love Chicken Dishes

Friday, June 18, is Father's Day and America's housewife will be catering to virtually every whim of the father of the house.

Learn about these whims in the Poultry and Egg National Research and Information Organization's survey of the poultry industry, which featured some well-known "queens of the kitchen" and "kings of the rooster." The survey came with some interesting facts for the official Father's Day chicken.

Fred MacMurray, TV father of the year, enjoys Dixie dip chicken, which is baked in red wine. Phil (Scooter) Rizzuto, radio father of the year is especially fond of the French style chicken which is simply breasts of chicken prepared similar to veal parmesan.

"Good old fried chicken" is the favorite of Phil Silvers stage father of the year. Echoing his sentiments were Kim Stanley, woman of the year, and Ralph Houk, sports father of the year.

Martin Gabel thrives on "chicken cooked by my wife, any form or any way", and his wife, Arlene Francis, likes roast chicken. They were named husband and wife of the year.

Chicken was proclaimed the official dad's day dish by Father's Day Council, Inc., New York, which for 26 years has furnished national leadership in celebrating the big event.

## ● Poultry Federation (From page 4)

Holland  
The Pennsylvania Poultry Federation's annual "Poultryman of the Year" award will be presented by former federation president, Leslie S. Hubbard, Lancaster Poultry and egg producers from all sections of the Commonwealth are expected to converge on University Park, June 29 and 30. The educational meetings begin Thursday morning, June 29, with

Penn State University's poultry housing specialist, Dr. Glenn Bressler, discussing the latest findings in housing, ventilation, egg gathering and process ng.

Dr. Ralph Baker, agricultural economist at Penn State, will tell the Keystone State poultrymen just what is happening in their industry in relation to other states and areas.

Carroll Dunham, president of the Northeastern Poultry Producers Council, Trenton, N. J., will report on his organization's suggested program for making free enterprise work—particularly as it applies to the poultry producer in the Northeast. This comes as a result of much study and research over a period of years.

What can poultrymen expect in the way of Federal legislation affecting the poultry industry? The answer to this perplexing and complicated question will be provided by Byron G. Allen, Assistant Secretary of Agriculture, U. S. D. A. As right hand man to Secretary of Agriculture Freeman, Mr. Allen is in a good position to bring a first hand, front row opinion of what our national legislators are thinking along this line.

Concluding the Conference will be a buffet luncheon at the University's poultry plant, Friday noon. Some of the latest convenience food items prepared from poultry meat and eggs will be a part of the menu.

## McCORMICK® No. 91 combine

with **MAGIC CIRCLE**  
PLANETARY STEERING

With planetary steering, steering levers control power flow to the two independent drive wheels—individually or together—for slowing down, stopping, turning gradually or sharply, or pivoting completely "on a dime." You can reverse instantly, too, without stopping to shift gears or disengage. With planetary steering, you can turn quicker and in less space than with any other combine!

Most **MANEUVERABLE** Combine Ever Built

8½-foot and 10-foot Cut!!

CORN UNITS AVAILABLE

CAPACITY—42 inches straight through... at thresh feeder, cylinder, over the straw rack... ready to spare for heavy crops.

Positive DOUBLE-SHAKE, closed-action cleaning for small, irregular and diversified fields and diversified crops you get into tight rows and close to fences, practically all the crop under, 40 hp valve-in-head engine for smooth, dependable power under speeds available 475 to 1,600 rpm.

- Bar-and-wire grate concave
- Extra-deep grain-saving platform
- Hydraulic control available for on-the-go adjustment of reel height
- 2-inch to 33-inch cutting height range—handles every threshable crop from low-growing beans to tall sorghum
- 67 factory-lubricated and sealed bearings reduce daily servicing to a minimum
- Big, 32-bu grain tank with folding unloading auger, can be unloaded in approximately one minute.

Steer with 2 levers  
instead of a steering wheel

Get the feel of planetary steering—with two convenient, easy-to-handle levers. It's built-in power steering — at no extra cost! Try it soon.

WITH

## Chipman DDT CL-40

A colloidal water-suspension containing four pounds of actual DDT per gallon

- 1 Particle size is exceptionally fine and uniform to assure uniform coverage, better sticking and lasting protection.
- 2 Colloidal water-suspension carrier does away with use of solvents and does not penetrate the leaves; consequently danger of shock and burning is reduced to absolute minimum.
- 3 Ready to use needs only addition to water
- 4 Remains in suspension for prolonged periods of time without settling and caking.
- 5 Has the combined advantages of a liquid and powder
- 6 May be used in all conventional type sprayers or mist-blowers
- 7 Requires only 2 quarts (2 pounds actual DDT) to 25 gallons of water per acre
- 8 May be mixed in spray tank with other insecticides, miticides and fungicides
