

**WASHEN CORDUROY**—and on fabric or best select-  
 or for the type of garments  
 and let tumble 10 to 15  
 minutes. Remove garments  
 and fingerpress the seams,  
 then put on hangers.  
 Choose foods that are plen-  
 tiful. These foods, because  
 they are abundant, usually  
 are good buys.

**SOAP AUTOMATIC  
 WASHER**

The soap or synthetic de-  
 detergent you use in your auto-  
 matic washer depends on the  
 kind of washer you have and  
 whether you have hard wa-  
 ter say Penn State extension  
 home management special-  
 ists. Usually a general pur-  
 pose detergent is recommend-  
 ed for all automatics. Low-  
 sudsing detergents are espe-  
 cially for use in automatics  
 since in some washers high  
 suds may interfere with  
 mechanical action.

On the average, it takes  
 about an hour and a half  
 to produce 100 pounds of  
 milk. Yet, there are some  
 herds producing 100 pounds  
 of milk with half as much  
 labor.

Milk production per cow  
 averaged 7,004 pounds in  
 1960 as compared with 4,033  
 pounds in 1934 and 5,007  
 pounds in 1947.

**Feed Grain Acreage Checks  
 To Begin In County Immediately**

Farmers who are taking  
 part in the 1961 feed grain  
 program should be ready  
 soon to have their acreage  
 checked, according to Landis  
 G. Becker, Chairman of the  
 Lancaster County Agricultural  
 Stabilization and Conserva-  
 tion Committee.

Mr Becker expects the  
 measurement of feed grain  
 acreage in the county to get  
 under way immediately with  
 employees of the county com-  
 mittee visiting farms that  
 are participating in the feed  
 grain program. During the  
 visits the acreage of corn and  
 grain sorghum will also be  
 measured.

The acreage of land desig-  
 nated as having been divert-

ed from the production of  
 corn and grain sorghum will  
 also be measured. The desig-  
 nated diverted acreage will  
 be measured and the current  
 use of the land will be recor-  
 ded. Diverted acreage is to  
 be used for approved conserva-  
 tion under the program.

Eight weeks is the time  
 estimated by Mr. Becker to  
 be required to visit and  
 check all the farms in the  
 county that are taking part  
 in the feed grain program.

Two thirds of the protein  
 in American diets comes from  
 animal products. Red  
 meat and dairy products rep-  
 resent only two per cent of  
 the Japanese diet and four  
 per cent of the Indian diet.

**HARSH HYDRAULIC HOISTS**

The 32 available models come to you with  
 a wide range of lifting capacities ranging  
 from 3 1/2 to 20 tons for your truck, pickup, or  
 trailer. The smooth, trouble-free action of a  
 HARSH HOIST has a fast lifting time of from  
 12 to 160 seconds, which allows more time  
 for actual hauling.

These hoists come to you at an average  
 cost of only 16¢ a day as compared to the  
 \$10-\$15 a day you now spend to manually  
 unload your truck.

To design and build a light weight, low-  
 costing truck hoist suitable for all types of  
 farm use, priced within the average farmer's  
 budget was the aim of "Bud" Harsh when  
 HARSH UNLIMITED MFG. CO. began  
 operations. This hoist was built and is now  
 in use throughout the nation.

The HARSH HYDRAULIC HOIST averages  
 only \$328.52 (including Federal excise tax)  
 and maintains a low taxable weight which  
 averages 273 lbs. These economical hoists  
 are built for either back or side dumping,  
 depending upon your need.

Save costly time and eliminate back-  
 breaking labor by unloading with a HARSH  
 HYDRAULIC HOIST engineered for eco-  
 nomical, speedy, and durable farm use.
