

Farm Women 22 Host Society 18

Three local charities were the beneficiaries of donations by the Society of Farm Women No 22 as the group met Tuesday afternoon at the home of Mrs Harold Zook, 22 Lampeter Road.

Contributions were made to the Conestoga Sertoma Club for the restoration of Buchmiller Park, Lancaster branch of the Needlework Guild of America and the United Fund.

Devotions were led by Mrs Kenneth Habecker, and 25 members responded to roll call with "What I did on my vacation."

Mrs Harold Mowrer gave a flower arranging demon-

stration and awarded a special prize which was won by Mrs John Neff.

At the next meeting of the group on October 10, in the Farm Bureau building in Lancaster, the nominating committee will present a slate of candidates. Mrs Wilmer Andrews, chairman of the nominating committee will be assisted by Mrs. Donald Kepner, Mrs. Hebron Herr, and Mrs Neff

Speaker for the October meeting, when Society No 18 will be the guests of Society 22, will be the Reverend Dr. Charles D. Spotts. Refreshments will be served by Mrs. William Weller, Mrs John Shenk, Mrs. Harry Shenk, Mrs Charles Shirey, Mrs. Cloyd Wenger, Mrs. Paul Witmer, Mrs. Zook, and Mrs Henry Hess.

Farm Women 14 Give Donation

The United Campaign was the recipient of a \$10.00 donation from Farm Women Society number 14 this week.

Co-hostesses at the Wednesday meeting of the group in the home of Mrs. Howard Moore, Lancaster R7, were Mrs John Hershey, Mrs. Jesse Groff, Mrs Walter Himmelreich, and Mrs J. Paul Hostetter.

Devotions were conducted by the hostess and the roll call featured suggestions for next year's program.

Members plan to visit the Lancaster County Home on October 19. Plans were also made to attend the county convention of Farm Women's societies on Saturday, Novem-

ber 4 in the Manheim Central High School.

The finance chairman displayed candles which the society will sell to raise funds. Mrs Burl N Osburn spoke on growing herbs and their use in cooking.

Next meeting of the group will be a bus trip to Biglerville and Chambersburg on October 10 with the bus leaving the Lancaster car barn at 8 a.m.

CLEANING TOOLS

For ease in household cleaning, proper storage for cleaning tools and supplies is essential, reminds Helen Bell Penn State extension specialist in home management. In a two-floor house, duplicate sets of mops, brooms, buckets and cleaning supplies

save energy. Duplicate sets in the kitchen and bathroom of a one-floor house save steps. Large pieces of equipment used in all parts of the house are best stored in a central location.

TRYING THE NEW

Trying the new is not folly, believes Catherine Love, Penn State extension specialist in consumer economics. Many food shoppers are alarmed that trying new food products is a sign of a purchase that goes beyond need and usefulness. But, with the rapid improvements and new developments being made in food today, it is essential that consumers know about new products. Often, they can mean better quality, more convenience, and wiser use of the food dollar.

Steer Feeders—

SHIPPING FEVER

A FREQUENT PROBLEM

The following procedure, based on ten years experience at Purdue, will assist in controlling shipping fever:

1. Unload cattle into dry lot with a shelter and dry bedding.
2. Give your cattle a comfortable place to rest until they have recovered from the stress of shipping. Complete rest and freedom from excitement is one of the keys to reducing shipping fever.
3. Allow free access to clean water and mineral mixture.
4. Feed low quality roughage, preferably a grass hay (timothy, brome), ground corn cobs, or a mixture of oats, straw and hay. Experience has shown that on lower quality roughage there is less trouble with shipping fever.
Do not feed a high quality legume hay such as alfalfa or clover for the next three weeks. This will result in scouring and may increase the incidence of shipping fever. Remember range cattle have been used to grass as roughage.
5. Sick animals, showing weakness, excessive secretion from eyes and nose, and heavy breathing should be isolated in dry, comfortable quarters and Treated By A Veterinarian. Inspect the entire herd 2 to 3 times daily. Quietly remove sick animals before treating.
6. After a period of several weeks the cattle, if healthy, can be moved to fall pasture or corn field. Any sick animals should be kept in dry lot until recovery.
7. See Next Weeks Advertisement for suggestions on how to get cattle on feed.
