Steer Feeders—

## Recommendations

## For Feeding

## During The Conditioning Period

You can help your cattle adjust themselves to feed lot environment by observing some of the following recommendations which are based on years of experience of many good steer feeders.

1. Start your steers on an antibiotic fortified feed **THE FIRST DAY** they arrive on the lot.

This feed should contain a higher protein content than grain, but less than a regular supplement, and approximately 250 mg of a broad spectrum antibiotic per pound (500 gms. per ton).

2. Feed no more than 2 pounds per head per day to beef calves. This will supply a daily antibiotic level of 500 mg. For yearling cattle and older, the initial 2 pounds should be increased by 1/2 pound per day until about 4 pounds per day is being fed. This supplies an antibiotic level of 1,000 mg per head per day.

3. Grain should be fed along with the antibiotic fortified feed in customary quantities gradually building up to full feed of grain. Feed half the recommended daily ration in the morning and half in the afternoon.

**CAUTION:** Do not feed any other protein supplement during the conditioning period.

4. If cattle are not "bunk broke", spreading some of the feed on the ground or spreading some salt over the feed in the bunk may help in getting the animals started. Mixing the antibiotic-fortified feed with grain or roughage in the bunk is also a good practice.

5. If steers do not consume all the feed and grain, it is well to supply the feed first and wait for it to be consumed before roughage is fed.

6. After 5 to 8 days on the program, change to **GREEN PASTURES STEER SUPPLEMENT No. 29** or **No. 30** and feed according to recommendations of your Miller & Bushong service representative.

7. Bloat can be a problem. If a conditioning feed is used to control bloat feed it at low levels - - - about one-third pound per head per day.

For a successful and profitable steer feeding program, contact any Miller & Bushong Service Representative or call us direct at Lancaster, EXpress 2-2145.

## Harvest Queen

**SOLANCO FAIRS HARVEST QUEEN**, Miss Jeanne Cutler, daughter of Mr and Mrs Jesse Cutler, Drumore, is crowned by retiring queen Anne Quigley, Quarryville. Miss Cutler, a 17-year-old senior academic student at Solanco High School, plans a career in nursing. She is a member of the Future Nurses of America, the Future Teachers of America, and the Solanco band and chorus. She was presented a \$50.00 savings bond by the Quarryville Lions Club. Runner up in the contest was Miss Betty Ulrich, of Peach Bottom. She received a \$25 bond. The excitement of the moment was too much for Miss Jane Housekeeper, of Nottingham R2, who swooned and required the use of smelling salts in order to revive in time to hear her name read as third place in the contest. Other contestants were Mary Ann Johnson, Quarryville R2, Christine Muler, Quarryville, Maria Frey, Quarryville R2, and Jane Abel, Quarryville. The queen was chosen by audience applause.

### Opening a new chapter in flail-type performance...

THE NEW ALLIS-CHALMERS 56-F FORAGE HARVESTER

*the clean, fast cut you want for better feeding silage, easier handled*

Your foliage is cut cleaner, shorter for green feeding or ensiling. Forage handling is easier... fewer long stems. Cattle clean it up much better. Tonnage mounts up quickly. Full six feet of scissor-slice shear power masters the heaviest, toughest crop! Here is a machine unequalled in quality and "beefy" construction. New-design chopping rotor with 36 free-swinging knives and full-length shear bar provides chopping efficiency you've never seen before in a flail-type!

You've never seen hay and forage power that saves You so much... ALLIS-CHALMERS D-SERIES TRACTORS
