

Local Firms Announce New Personnel

Two local firms recently announced additions of personnel to their staffs. John W. Eshleman and Sons of Lancaster has employed Carey L. Quarles, University Park as manager of the Red Rose Research Center. Edwin Wallis and Sons, Liverpool, Pa. announce the appointment of John H. Herr, Jr. of Annville and David E. Lauver, Lancaster, as sales and service counselors for the leghorn hatchery firm.

Quarles, a native of Buchanan, Virginia, is a graduate of Virginia Polytechnic Institute, Blacksburg, Virginia, where he received his Bachelor

of Science degree in the past year he was a graduate poultry husbandry. During his assistant in the poultry

ments, testing, and compilation of technical sales information.

Lauver has been associated with the Poultry industry in Central Penna. for the past 5 years. Prior to this work he was in the sales division of Sears Roebuck, Co.

Lauver was born and reared on a Juniata County farm, Millintown, R. D., Pa. He will represent Wallis and Sons Hatchery, selling baby chicks in York, Cumberland, and Adams counties.

Mr. and Mrs. Lauver and their son, David B., age 3, live at 334 Ruby St., Lancaster, Pa.

Herr has been associated with Florin Farms, Mt. Joy, for the past 3½ years in their sales and service division. Prior to that he served two years in the Chemical Corps, U. S. Army. He was born and reared on a Lebanon County farm. He won top honors in the Lebanon county plowing contest in 1954, 1956 and 1957. In 1954 he

completed his work for a Master of Science degree in the department of Pennsylvania State University.

His duties at the Red Rose Research Center will include the supervision and analysis of feed development.

WHEN YOU ARE READY TO HOUSE YOUR PULLETS!

Pullets moved from range to the laying house find themselves in an entirely new environment, "Strange Quarters", as far as they are concerned.

1. Supply extra fountains around the floor and on the roosts, also feeders.

Some of the birds which looked so nice when you brought them in will have difficulty finding feed and water at first and get uneven and lose some weight unless feed and water consumption is kept at a high level by extra waterers and feeders.

2. Feed #33 EARLY BIRD POULTRY FITTING RATION in hoppers first 2 weeks instead of scratch.

When birds are brought in off range lack of exercise may cause some constipation. Fitting ration helps keep comb color and vigor.

3. When changing to scratch don't have your litter too deep in the house at first.

Scratch in deep litter when pullets are housed is apt to cause a decrease in feed consumption the first few days. Put some scratch in the feeders as well as on the floor at the start.

When chickens are used to their quarters after the first few weeks build up litter gradually to desired depth.

4. If your chickens start to lay on range DO NOT FORGET Oystershells or Calcite Grit.

Without these the birds will draw on her calcium reserve in the bone structure to make the shells. This will eventually result in some weak and poor birds and poor shell quality.

5. Early Bird All Mash Ration or Early Bird Egg Mash and Grain will help you to efficient LOW COST production of quality eggs with just the right yolk color.

If we can be of help to you in any poultry problem, please call your Miller & Bushong representative or dial EXpress 2-2145 direct.

NOTE: The care you give your birds during the first month they are housed will largely determine how profitable your flock will be during its laying year.
